FIFTY-FIFTH NUMBER

UNITED STATES
GOVERNMENT PRINTING OFFICE
WASHINGTON : 1933

LETTER OF SUBMITTAL

DEPARTMENT OF COMMERCE,
BUREAU OF FOREIGN AND DOMESTIC COMMERCE,
Washington, September 1, 1933.

SIR: I have the honor to submit herewith for publication the fifty-fifth annual issue of the Statistical Abstract of the United States. This annual volume is a convenient summary of authoritative statistics showing the trends in trade and industry as well as social progress and is extensively used by business men, economists, statisticians, and students.

The present volume has been prepared in the Division of Economic Research, under the general direction of Ernest A. Tupper, acting chief of the division, and the more immediate charge of Martha Hunter. The volume represents a digest of data collected by all statistical agencies of the National Government, as well as those of a considerable number of private agencies and several States. Many of these offices and agencies have been of great assistance in furnishing advance data and also in the actual preparation of the tables used in the Abstract. Special mention in this connection is due the following offices of the Federal Government: The Bureau of the Census, the Bureau of Fisheries, and the Bureau of Mines of the Department of Commerce; the Bureau of Agricultural Economics and the Weather Bureau of the Department of Agriculture; the Bureau of Immigration and the Bureau of Labor Statistics of the Department of Labor; the Office of Education of the Department of the Interior; the Federal Board for Vocational Education; the Statistical Division of the Income Tax Unit of the Treasury Department; the Veterans' Administration; the Interstate Commerce Commission; the United States Shipping Board; and the Division of Research and Statistics of the Federal Reserve Board.

Respectfully,

WILLARD L. THORP,
Director.

TO HON. DANIEL C. ROPER,
Secretary of Commerce.

¹Based on land area.

²In comparing this percentage of increase with that shown for the decade 1910–1920, allowance should be made for the fact that the period between the censuses of 1910 and 1920 was less than a full decade, and that between the 1920 and 1930 censuses was more than a full decade. An increase of 16.1 per cent for 123 months (the time between Jan. 1, 1920, and Apr. 1, 1930) is equivalent to 15.7 per cent for exactly 10 years, and the 1920 increase for 116½ months (the time between Apr. 15, 1910, and Jan. 1, 1920) is equivalent to 15.4 per cent for 120 months. Making this adjustment, the rate of increase for the decade ending in 1930 is only slightly higher than that for the preceding decade.

No. 5.—DENSITY OF POPULATION PER SQUARE MILE, BY STATES

NOTE.—The population of continental United States has been divided by the total land area, although it included at each census some unorganized territory which was not canvassed by the enumerators. For each State or Territory the population as returned at a given census has been divided by the land area as constituted at the time that census was taken. The areas of Indian reservations, outside of Indian Territory, are included in the areas of the several States and Territories, although the population was not ascertained and can not be considered in figuring density of population prior to 1890. The census of 1870 in the Southern States is considered incomplete. Population density in 1930 of Alaska, Hawaii, and Puerto Rico, and of Philippine Islands, December 31, 1918, based on gross area, and not land area, was as follows: Alaska, 0.1; Hawaii, 57.5; Puerto Rico, 419.5; Philippine Islands, 90.0.

No. 11.—POPULATION ANNUAL MIDYEAR ESTIMATES BY STATES

NOTE.—Estimates of population from 1923 to 1930 are based on the assumption that the increase (or decrease) each year between the censuses of 1920 and 1930 is equal to the annual average change between the two enumerations. For 1931 and 1932, the total population is estimated upon the basis of the available birth, death, immigration and emigration figures and the increase in the United States total distributed to the various States according to the per cent which each State increase was of the United States increase between 1920 and 1930. If a State showed a decrease in population between 1920 and 1930, the 1930 census figure was used and no estimate made. For actual enumerations, 1790 to 1930, see Table 6, p. 4

No. 12.—POPULATION: ANNUAL MIDYEAR ESTIMATES FOR CONTINENTAL UNITED STATES, AND CERTAIN OUTLYING TERRITORIES AND POSSESSIONS

NOTE.—Estimates, except for continental United States, 1931 to 1933, are based on the assumption that the increase each year between two successive censuses is equal to the annual average increase between the two enumerations. Estimates for continental United States, 1931 to 1933, are based on available data regarding births, deaths, immigration, and emigration

¹ Enumeration in Southern States incomplete, this affects especially figures for the negro population² White population includes Mexicans prior to 1930. The estimated number of Mexicans included in the white classification in 1920 was as follows. Total, 700,541; native white, 243,181 (172,704 of foreign parentage and 70,477 of mixed parentage); foreign-born white, 457,360. For close comparison with 1930, adjusted figures for 1920 may be obtained by deducting these from the white population as reported in 1920³ Exclusive of Indians in Indian Territory and on Indian reservations, not enumerated prior to 1890⁴ Comprises Filipinos, Hindus, Koreans, Hawaiians, Malays, Siamese, Samoans, and Maoris.⁵ Less than one-tenth of 1 per cent. ⁶ A minus sign (—) denotes decrease.⁷ Exclusive of 325,464 persons (117,368 whites, 18,636 Negroes, 189,447 Indians, and 13 Chinese), specially enumerated in 1890 in Indian Territory and on Indian reservations.⁸ Increase over figures adjusted for 1920 on account of Mexicans. See footnote 2.⁹ Increase over estimated number in 1920. ¹⁰ Per cent not shown where base is less than 100.

¹ A minus sign (—) denotes decrease.² Boundaries changed between 1910 and 1920. Statistics for 1910 relate to pre-war boundaries.³ Persons reported in 1910 as of Polish mother tongue born in Germany (190,096), Austria (329,418), and Russia (418,370) have been deducted from the respective countries and combined as Poland for comparison with number reported in 1920 as born in Poland. Though Poland before 1919 was divided among Russia, Germany, and Austria, the censuses of 1880 to 1900 listed it as a country of birth.⁴ Created since 1910.⁵ Included as part of Yugoslavia in 1920 and 1930.⁶ Turkey in Asia included with Turkey in Europe prior to 1910.⁷ Albania included with Turkey in Europe in 1910 and earlier years.⁸ Newfoundland included with Canada prior to 1910⁹ Except possessions of the United States.

¹ A part of the decreases from 1920 to 1930 in the percentage illiterate in some States is doubtless due to the separate classification in 1930 of Mexicans who were included in 1920 with the white population

No. 40—FAMILIES BY TENURE, AND AVERAGE POPULATION PER FAMILY

NOTE.—A family is defined as a group of persons related either by blood or by marriage or adoption who live together as one household usually sharing the same table. Single persons living alone are counted as families, however, as are a few small groups of unrelated persons sharing the same living accommodations as "partners." In the 1920 count, inmates of an institution were treated as a single family as were also other quasi-family groups. Families not reporting tenure are included in the totals for all families.

¹ Private families only, excluding 75,178 institutions, hotels, etc. ² These quasi-family groups were included in the count as made for 1920.

³ The first of the two averages shown for 1930 is obtained by dividing the total population by the combined number of private families and quasi-family groups (institutions, hotels, etc.). This figure is strictly comparable with the 1920 average. The second average presented for 1930 is obtained by dividing the total population living in private families by the number of private families.

¹ Because of changes made in 1930 in the classification of agricultural pursuits, it is impossible to group the 1920 occupations exactly according to the 1930 classification. It is believed, however, that the effect of the difference in grouping on the comparability of figures here presented is negligible. Figures have been adjusted to exclude those employed on turpentine farms classified in "Agriculture" in 1920 (see Note 5).

² Since, in 1920, only farm laborers on general farms were distinguished as working on "home farm" or "working out," farm laborers on dairy farms, stock farms, truck farms, poultry farms, etc., who were, in fact, working on the "home farm" as "unpaid family workers" were not included in "Farm laborers (home farm)." Hence, as here compiled for 1920, the number of farm laborers classified as "Wage workers" probably is somewhat too large, and the number classified as "Unpaid family workers" somewhat too small.

²⁰ Selected occupations.

²¹ Not classified separately in 1920.

²² Neither in 1920 nor in 1930 was the attempt to distinguish chauffeurs and motor truck drivers from draymen, teamsters, and carriage drivers very successful.

²³ Teamsters in agriculture, forestry, and the extraction of minerals are classified with the other workers in those industries, respectively; drivers for bakeries and stores are classified as deliverymen in trade, and drivers for laundries are classified as deliverymen in domestic and personal service.

²⁴ Included with "Draymen, teamsters, and expressmen" in 1920.

²⁵ Because of indefinite returns by census enumerators, it is probable that some stationary engineers were included with locomotive engineers, and some firemen of stationary boilers with locomotive firemen.

³ Not reported.

⁴ No almshouses maintained.

GENERAL NOTE.—The figures contained in this section can not be taken as an absolute index of conditions. The provisions for the care of these classes are so divergent in different States, and in the same State at different times, that the enumeration of persons in certain institutions may be far from reflecting the true differences or changes in the relative number of such persons in the population at large. Moreover, the methods of enumeration have been changed from time to time. The difficulty of formulating an adequate definition, the large element of personal judgment of the enumerator, and reluctance on the part of individuals to admit defects, all affect the accuracy of the data.

3. VITAL STATISTICS

GENERAL NOTE—Vital statistics are registered by the States in the first instance, but duplicates of the original certificates of individual births and deaths are received and tabulated by the Census Bureau. Owing to the gradual expansion of the "registration" areas (see Tables 68, 74, and 83), the number of births and deaths for the areas as a whole are not strictly comparable but, in most cases, the rates are affected very slightly.

General tables cover the registration area in continental United States. Hawaii and the Virgin Islands are shown separately in certain tables. Stillbirths, shown in Table 78, are excluded from data for both births and deaths.

Rates for the years 1920 to 1929 are based on population estimates revised to conform with the 1930 census returns. Rates for the years 1930 and 1931 are based upon the best estimates of population available at this time.

Beginning with 1930 the Bureau of the Census includes Mexicans with the colored in tables showing data by color. In such tables, for this section, Mexicans have been included with the white for 1930 and 1931 in order that the data may be comparable with previous years.

4. IMMIGRATION AND EMIGRATION

In compiling immigration statistics for the United States, Alaska, Hawaii, and Puerto Rico, beginning 1904, 1901, and 1922, respectively, were included. In prior years the transfer of population between them and the United States was considered immigration.

No. 86.—IMMIGRATION: 1821 to 1932

NOTE.—For 1821 to 1867 the figures represent alien passengers arriving, for 1868 to 1903, immigrants arriving, for 1904 to 1906, aliens admitted, for 1907 to date, immigrant aliens admitted. Data are for fiscal years ended June 30 except as noted, for periods they are totals, not annual averages.

No. 93.—IMMIGRATION, BY COUNTRY OF LAST PERMANENT RESIDENCE, 1841 TO 1930

NOTE.—For 1841 to 1867 figures represent alien passengers arriving; for 1868 to 1903, immigrants arriving; for 1904 to 1906, aliens admitted; thereafter, immigrant aliens admitted. Owing to changes in the lists of countries separately reported and to changes in boundaries, data for certain countries are not comparable throughout. Countries added to the list since the beginning of the World War were theretofore included with the countries to which they belonged. Data are totals (not annual averages) for periods ended June 30 since 1870, Dec 31 theretofore, except as noted

No. 96.—IMMIGRATION QUOTAS ALLOTTED, AND QUOTA ALIENS ADMITTED: BY COUNTRY OR REGION OF BIRTH, YEARS ENDED JUNE 30

NOTE.—The immigration act of 1921 limited the number of aliens admitted annually of any nationality subject to the quota law, to 3 per cent of the number of foreign-born persons of such nationality resident in continental United States as determined by the Census of 1910, the population plan of the act of 1924, to 2 per cent according to the Census of 1890. The national origins clause of the latter act, which became effective July 1, 1929, provided that the quota of any nationality should be computed by applying to 150,000 the ratio between the calculated number of inhabitants in continental United States in 1920 owing their origin to the nationality concerned and the total inhabitants in the United States of all nationalities subject to the quota law. (For estimates of white population by countries of origin, calculated as a basis for immigration quotas, see Table 97, Statistical Abstract, 1932.) Under the act of 1924, the minimum quota is 100. Both immigrant and nonimmigrant aliens may appear in quota law statistics, or aliens of both classes may not be counted against quotas at all.

¹ Quota for 1924; revisions from 1922 or 1923 allotments for certain countries were made due to changes in boundaries or other adjustments.

² Admissions from certain countries in excess of quota occurred in 1922 in cases involving unusual hardship.

³ The total quota for 1930 and 1931 was 153,714. The change in 1932 was due to a decrease in Russia's quota from 2,784 to 2,701 and new allotments of 100 each for Bessarabia and Hejaz and Nejd.

⁴ All Ireland included with United Kingdom prior to 1925; thereafter, Northern Ireland only.

⁵ Includes quota immigrants born in colonies, dependencies, or protectorates of European countries.

No. 120.—VOCATIONAL EDUCATION: PUPILS ENROLLED IN VOCATIONAL COURSES AND TEACHER TRAINING COURSES, YEAR ENDED JUNE 30, 1932

NOTE.—Institutions Federally aided are reimbursed out of Federal funds provided under (1) the act known as the Smith-Hughes Act, or the national vocational education act of 1917, (2) acts of 1921 and 1931 extending the benefits of vocational education to Hawaii and Puerto Rico, (3) the George-Reed Act of 1929. These acts, administered by the Federal Board for Vocational Education, provide appropriations by Congress for reimbursement in part out of Federal funds for expenditures by States and local communities for salaries of vocational teachers and maintenance of vocational teacher training.

No. 122.—VOCATIONAL REHABILITATION OF PERSONS DISABLED IN INDUSTRY OR OTHERWISE. YEARS ENDED JUNE 30

NOTE.—By the civilian vocational rehabilitation act of June 2, 1920, Congress set up a program of cooperation with the States for the vocational rehabilitation of persons disabled in industry or otherwise. By the end of the fiscal year 1932 all but 4 States had accepted the provisions and begun cooperation with the Federal Government. The figures shown relate only to cases aided by Federal funds. The total expenditure in 1932 (fiscal year) comprised Federal funds, \$986,148, State and private funds, \$1,179,666.

¹ In the adjustment of this grant the road was treated as an entirety and without reference to the State line. Hence Alabama has had approved to her more and Mississippi less than they would appear to be entitled to in proportion to the length of road in the respective States.

² Includes 35,685 acres of the Chicago, Rock Island & Pacific Ry.; 109,757 acres of the Cedar Rapids & Missouri River R. R.; and 77,535 acres of the Dubuque & Sioux City R. R., situated in the old Des Moines River grant of Aug. 8, 1846, which should be deducted.

³ Declared to be 1 grant.

⁴ See Minnesota for original grants.

⁵ Leavenworth, Lawrence & Galveston includes 186,937 acres and Missouri, Kansas & Texas 270,971 acres in the Osage ceded reservation which are to be deducted under decision of the Supreme Court.

¹ Figures include 1920 census data for States in which there are no Indian agencies. ² As of Apr. 1.

³ Beginning 1930, Indians no longer under the jurisdiction of the Office of Indian Affairs are not included. The decrease between 1930 and 1932 was due to the elimination of freedmen and intermarried whites of the Five Civilized Tribes and the inclusion of the Census Bureau figure. See note 4.

⁴ Figures include data for the Five Civilized Tribes, as follows: 1900, 84,570; 1910, 101,278; 1920 and 1930, 101,506. The latter figure is according to the final rôle of Mar. 4, 1907, and includes 23,405 freedmen and 2,582 intermarried whites. It is impossible to give a reliable estimate of living members. The 1932 figure includes 72,643 members as reported by the Bureau of the Census.

No. 136.—CLIMATIC CONDITIONS: SELECTED CITIES IN THE UNITED STATES

NOTE.—The table presented herewith shows the more important facts concerning the weather at a number of points in the United States selected with a view to covering all the important climatic sections and including at least one from each State. The temperature extremes include the entire period of observations to Dec 31, 1932. Other data are long-time averages covering periods ranging from 20 to more than 50 years. All monthly mean temperature values except those at Asheville, Hartford, Miami, Providence, and Wilmington, are normals, based on long records. Similarly, all monthly averages of precipitation are normals except the amounts given at Wilmington. Average hourly wind velocity data are 3-cup anemometer values corrected through 1930. Temperatures are Fahrenheit.

No. 137.—ARMY OF THE UNITED STATES: STRENGTH OF COMPONENT PARTS

NOTE.—Prior to 1914, table covers quinquennial years and years in which considerable changes occurred in the number of Regular Army. Figures for Officers' Reserve Corps include Regular Army enlisted men and also, prior to 1924, National Guard officers, holding commissions in the Reserve. There is, therefore, some duplication in the grand totals, but the number of this personnel is not so great as to make a material difference in the figures

¹ Includes Philippine Scouts beginning with 1902. Figures for 1919 to 1926, inclusive, include in most cases World War emergency personnel still in service. All emergency enlisted men still in service were discharged on July 2, 1921. On Nov 11, 1926, the last emergency officer was discharged, thereby completing the demobilization of the World War Army. Retired personnel on active duty are not included.

GENERAL NOTE.—Under the act of July 3, 1930, all governmental agencies affecting war veterans were consolidated into one establishment, the Veterans' Administration. The various forms of veterans' relief are summarized below.

Pensions are awarded to veterans and dependents of veterans of all wars whose claims are based on military or naval service prior to April 6, 1917, and after July 2, 1921. The average payments vary according to the age of the veteran and the war during which the service was rendered.

Domiciliary care is provided for all honorably discharged veterans who have been disabled by disease or wounds so as to be incapacitated for earning a living and who have no adequate means of support.

Compensation is awarded for death or disability resulting from personal injuries received or diseases contracted in the military or naval service on or after April 6, 1917, and before July 2, 1921, or for an aggravation or recurrence of a preexisting disability resulting from such service. The rates of compensation range from \$8 per month for a temporary disability to \$200 per month for double permanent total disability. In some instances a \$50 allowance for an attendant is granted in addition to other compensation.

Disability allowance—An amendment of July 3, 1930, provides for a disability allowance to ex-service men who served 90 days or more during the World War and who are suffering from a permanent disability of 25 per cent or more not acquired in service and for which compensation is not payable.

Yearly renewable term insurance—During the period of the war and until July 2, 1927, yearly renewable term insurance ranging from \$500 to \$10,000 was issued. All term insurance not converted into permanent United States Government life insurance before July 2, 1927, lapsed. Claims upon such policies are paid in 240 monthly installments except where there is no beneficiary named or where the beneficiary named dies before receiving all of the payments, the remainder is paid in one sum.

Medical and hospital care—In addition to compensation payments, the disabled person is furnished reasonable Government medical, surgical, and hospital service and supplies, and appliances considered reasonably necessary. Government hospital facilities are also available for veterans of the Spanish-American War, the Philippine Insurrection, the Boxer Rebellion, or the World War, suffering from neuropsychiatric or tubercular ailments and diseases, paralysis agitans, encephalitis lethargica or amoebic dysentery, or loss of sight of both eyes, whether such ailments or diseases are due to military service or otherwise. The administration is also authorized, as far as Government facilities permit, to furnish hospitalization and necessary traveling expenses to veterans of any war since 1897, without regard to the nature or origin of their disabilities. By act of June 11, 1930, retired enlisted men of the Navy and Marine Corps and transferred members of the Fleet Naval Reserve and the Fleet Marine Corps Reserve were placed on an equal footing with veterans entitled to hospitalization under previous acts.

Vocational rehabilitation—Under the act of July 27, 1918, honorably discharged ex-service men who were unable to carry on in a gainful occupation successfully were provided with vocational training at Government expense. Rehabilitation activities of the bureau ceased with the close of the fiscal year 1928.

United States Government life insurance—U. S. Government life insurance is issued in any multiple of \$500, not less than \$1,000 or more than \$10,000, upon the payment of premiums at a net peace-time rate, with no extra charge for administration or excess mortality due to the hazards of war. (For forms of insurance see Table 147, for rates, Table 143, Statistical Abstract 1932.) The policies carry the usual provisions common to policies issued by commercial companies, such as extended insurance, paid-up insurance, cash surrenders, and loans. Dividends are also paid from excess of interest earnings and savings in mortality.

Adjusted compensation—The act of May 19, 1924, authorized the payment of adjusted compensation to all veterans of the World War, excluding officers above the grade of captain in the Army or Marine Corps or similar rank in the Navy and Coast Guard. The rate of adjusted compensation for service in excess of 60 days is \$1.25 and \$1 per day and the amount of credit is limited to \$625 and \$500 for overseas and home service, respectively. Veterans entitled to not more than \$50 are paid in cash and others are given a 20-year endowment insurance policy for an amount that the adjusted service credit increased by 25 per cent would purchase at the age of the veteran on the birthday nearest the date of the certificate, with interest at 4 per cent compounded annually. An amendment authorized the bureau to make loans to veterans on adjusted-service certificates. Applications for adjusted compensation may be filed to January 2, 1935.

Retirement of disabled emergency officers—The act of May 24, 1928, provides that all emergency officers who served during the World War who have a permanent disability incurred in line of duty of 30 per cent or more shall receive retirement pay and be entitled to the same privileges as provided for officers of the Regular Army, Navy, or Marine Corps who have been retired for physical disability incurred in line of duty.

No. 153.—CIVIL SERVICE RETIREMENT: SUMMARY, YEARS ENDED JUNE 30

NOTE.—Retirement for civil service employees was established by act of May 22, 1920. Under this act and amendments of July 3, 1926, and May 29, 1930 (effective July 1, 1930) employees of the classified service with competitive status, most of the principal groups of unclassified laborers, and certain other groups are eligible for retirement on annuity at the ages of 62, 65, and 70, according to the class of service, if they have rendered at least 15 years of service. The last-named act permits the optional retirement of employees two years before reaching the retirement age where they have rendered at least 30 years of service and also provides for the retirement of those in the service not less than 5 years who, before reaching the retirement age, become disabled. From the basic compensation of each employee within the scope of the acts there is deducted 3½ per cent (2½ prior to July 1, 1926) thereof for deposit to the credit of the retirement fund. All amounts deducted prior to July 1, 1930, and thereafter amounts deducted less \$1 per month are credited to the employee's individual account. Under the amendment of May 29, 1930, annuities are composed of (1) a sum equal to \$30 for each year of service not exceeding 30 and (2) the amount of annuity purchasable with the sum credited to the individual's account together with interest at 4 per cent per annum.

¹ Includes clerks, city carriers, village carriers, and employees in motor-vehicle service at classified post offices, rural carriers, fourth-class postmasters, and seapost clerks.

² Railway mail clerks, classified May 1, 1889.

³ The large increase in field service figures for 1913 is due to the inclusion of navy-yard artisans' positions to the number of about 16,000 in the competitive classified service.

⁴ Jan. 16, 1884, to Jan. 15, 1885.
⁵ 11,635 fourth-class postmasters, appointed in 1914 and 18,238 in 1915, under the Executive order of May 7, 1913, requiring examinations at offices whose incumbents had not been appointed under the regulations, are not included in this table.

² Figures prior to 1928 do not include votes cast for names not appearing on the electoral tickets specified in the table. In 1928 and 1932 they represent the entire vote cast, including in 1928, 48,770 votes (35 States) cast for the Workers electors and 67,951 scattering, defective, blank, and void ballots, and in 1932, 53,425 votes (10 States) cast for the Liberty electors, 102,991 votes (39 States) cast for the Communist electors, and 69,173 scattering ballots.

³ Democrat-Populist.

⁴ Socialist-Labor only. In 1924 practically all the Socialist vote is included in votes in next column for La Follette and Wheeler, official candidates of the Socialist Party as well as the Independent Progressive.

⁵ Includes 659 Industrialist votes.

9. NATIONAL GOVERNMENT FINANCES

General note as to bases used in compiling statistics of receipts and expenditures of the United States Government—Four different bases are used in compiling both the receipts and expenditures of the Government. These bases, in the case of receipts, are the daily Treasury statements (unrevised and revised), warrants issued, and collections reported. The expenditures of the Government are published on the first three of these bases and also on the basis of checks issued. Figures in the daily Treasury statements (unrevised) which are on a current cash basis are compiled from the latest daily reports from the Treasury offices or public depositories. Owing to the distance of some of these offices and depositories from the Treasury, reports from them are somewhat delayed in reaching the Treasury, and consequently it is necessary to issue the unrevised Treasury statements before they are received. In order to show the actual receipts and expenditures for any month or year, it is necessary to take into account these delayed reports. The figures for actual transactions during a month or year which are calculated by the use of these reports are said to be on a basis of daily Treasury statements (revised). The unrevised figures are the basis of the Budget estimates submitted to Congress by the President.

It is provided by law that warrants shall be issued by the Secretary of the Treasury in acknowledgment of money received, and that warrants must be drawn by the Secretary of the Treasury for all disbursements of money. Some of these warrants for expenditures do not represent actual payments but are merely advances of credit to disbursing officers, who then issue checks in payment of Government obligations. Expenditures on the basis of warrants issued include unexpended balances to the credit of disbursing officers at the end of the year but do not include expenditures made during the year from unexpended balances of the preceding year.

Expenditures on the basis of checks issued (Table 166) represent most accurately the actual expenditures during any given year. They differ from expenditures shown by daily Treasury statements (revised), because they include checks outstanding at the end of the year and exclude unpaid checks at the beginning of the year.

All figures for receipts and expenditures include the figures of postal surpluses or deficiencies only and consequently leave out the gross figures of postal revenues and expenditures.

¹ Exclusive of the deposits made by banks to retire national bank and Federal reserve notes and of payments made from this fund to retire such notes, these are in the nature of fiduciary transactions. Both columns include redemption-exchange transactions.

² Based on reports of the Post Office Department. Expenditures include adjusted losses, etc., postal funds, and expenditures from postal balances, they exclude departmental expenditures in Washington, D. C., to the close of the fiscal year 1922, and amounts transferred to the civil-service retirement and disability fund, fiscal years, 1921 to 1926; in 1927 to 1932 the 3½ per cent salary deductions are included.

³ Averages are for entire 10-year period though there were no receipts or retirements certain years.

⁴ Not including net payments of \$267,735,000 from credits established through purchase of obligations of Reconstruction Finance Corporation (treated as a public-debt transaction in accordance with Reconstruction Finance Corporation act).

¹ Up to 1915, inclusive, civil expenditures under War and Navy Departments at Washington are included under the column, Civil and Miscellaneous; thereafter, under War and Navy Departments, respectively. War Department expenditures include those for rivers and harbors and the Panama Canal.

² Figures for Indians and Pensions, all years, for U. S. Veterans' Bureau prior to 1923, and for Postal deficiencies prior to 1922, are on the basis of warrants issued.

³ Includes only Army and Navy pensions for service prior to World War and fees of examining surgeons. Does not include salaries under Bureau of Pensions or payments to veterans of the World War made by the War Risk Insurance Bureau and Veterans' Bureau.

⁴ Prior to 1922 data represent expenditures by Bureau of War Risk Insurance and for vocational rehabilitation. They include operations in Government life insurance trust funds and adjusted-service certificate fund, all years.

⁵ Exclusive of amounts transferred to the civil-service retirement and disability fund.

⁶ Averages are for entire period, though there were no expenditures in certain years.

⁷ Expenditures of the Veterans' Administration, including former Veterans' Bureau, Bureau of Pensions, and Bureau of National Homes. Army and Navy pensions and fees of examining surgeons amounted to \$233,324,000 in 1931 and \$232,237,000 in 1932.

¹ Totals prior to 1922 are not comparable with later years because of changes in classification of general and special expenditures² In the fiscal years 1921, 1922, and 1923, material changes were made in classification of expenditures between legislative establishment, executive proper, and other independent offices and commissions³ Alien property funds included under executive proper prior to fiscal year 1922⁴ Payments for veterans' relief made prior to Aug. 11, 1921, by the War Risk Insurance Bureau are included under Treasury Department, and by the Federal Board for Vocational Education, under other independent offices and commissions. Figures shown under Veterans' Administration represent Veterans' Bureau for 1922 to 1930. In 1931, Veterans' Bureau, Bureau of Pensions, and Bureau of National Homes were consolidated into one establishment⁵ Refunds of customs and internal revenue receipts and investments of Government life insurance fund included under Treasury Department and postal deficiency under Post Office Department prior to 1922⁶ Bureau of Prohibition transferred from Treasury Department to Department of Justice on July 1, 1930⁷ Post Office Department expenditures for 1921 include \$65,576,000 paid to the Railroad Administration. This resulted in a corresponding decrease in expenditures for Federal control of transportation⁸ Deduct, excess of credits⁹ Post Office Department expenditures include \$42,997,000 and postal deficiency, \$9,000,000, representing payment of so-called back railway mail pay to inland carriers.¹⁰ Civil service retirement fund, established May, 1920, included under Interior Department prior to 1922.

¹¹ Patent Office and Bureau of Mines transferred from Interior Department to Commerce Department under executive orders of Mar. 17, 1925, and June 4, 1925, respectively.

¹² Bureau of Pensions, formerly under Interior Department transferred to Veterans' Administration in 1931.

¹³ In 1922 to 1925 additional allotments for veterans' relief are included under the Treasury, War, and Navy Departments, and in 1924 and 1925 also under the Interior Department. In 1922 these allotments amounted to \$81,746,000; in 1923, to \$10,706,000; in 1924, to \$6,411,000, and in 1925, to \$6,058,000.

¹⁴ Teachers' retirement fund included under District of Columbia prior to 1922.

¹⁵ Figures are net and allow for receipts and deposits credited to the account concerned.

¹⁶ Includes \$228,399,000 payments on certificates of indebtedness of Director General of Railroads.

¹⁷ Deduct, excess of credits resulting from receipts of \$266,637,000 from sale of equipment trust notes and \$123,783,000 from sale or collection of other securities acquired under the transportation act, 1920. In 1923 and 1924 receipts on these accounts were included under miscellaneous receipts.

¹⁸ Deduct, excess of credits resulting from deposits by War Finance Corporation of proceeds of United States securities redeemed.

¹⁹ Includes \$350,000,000 in 1920, \$100,000,000 in 1921, and \$25,000,000 in 1922 applied by U. S. Grain Corporation to reduction of capital stock and reflected in miscellaneous receipts for those years; the 1921 figure represents net expenditures after taking into account credits.

No. 168.—INTERNAL REVENUE: AMOUNTS COLLECTED FROM PRINCIPAL SOURCES

NOTE.—All figures in thousands of dollars. The figures represent collections by internal revenue officers throughout the country, including deposits by postmasters of amounts received from sale of internal revenue stamps and deposits of internal revenue collected through customs offices, and, therefore, differ from those in Tables 160, 162, and 165 which represent the deposits of these collections in the Treasury or depositories during the fiscal year concerned, there being thus an overlapping of time. Certain items, included in the totals in the last column, are shown in detail in the second part of the table

No. 171.—INDIVIDUAL AND CORPORATION INCOME TAX RETURNS: SUMMARY

NOTE.—All money figures in thousands of dollars. Statistics are based on the taxpayers' returns as filed, unadjusted except to insure proper execution of the return. Under the various revenue laws the following individuals were required to file personal returns. For 1913 to 1916, those with net income of \$3,000 and over, 1917 to 1924, \$1,000 and over, 1925 to 1930, \$1,500 and over; or if married and living with husband or wife filing a joint return, \$2,000 for 1917 to 1923, \$2,500 for 1924, and \$3,500 for 1925 to 1930, also, beginning 1921, individuals with gross income of \$5,000 or over regardless of net income. Data for returns of individuals showing no net income, filed in accordance with the latter provision, are not included in statistics shown. All income tax data include Alaska and Hawaii.

¹ Capital net gain from sale of assets held more than 2 years is included in net income, but capital net loss from sale of assets held more than 2 years and net loss for prior years are not deducted

² If not wholly exempt from tax

³ Relates to net gain from sale of assets held for more than 2 years; this amount, less certain allowable deductions, is exempt from normal tax but subject to a special tax. See note 4, Table 172.

⁴ Specific exemptions exceed net income.

⁵ Tax (12½ per cent) on capital net gain from sale of assets held more than 2 years, less tax credit of 12½ per cent on capital net loss on such sale.

¹ Callable and payable dates of all issues of postal savings bonds fall within the period indicated

² Issues and retirements include conversion transactions

³ Funds acquired during the year are invested in short-term securities redeemable in one to five years. These issues in varying amounts will be outstanding indefinitely

⁴ Payable date. These notes may be redeemed one year after date of issue. All issues outstanding are now callable except series 1937 which is callable June 30, 1933

⁵ Funds are invested in short-term securities which are redeemed from time to time to meet current obligations. These transactions will occur until adjusted-service certificates mature about 1945.

⁶ Treasury bills are sold on a discount basis on competitive bidding. The average sales price given as approximate yield on a bank discount basis.

No. 197.—TAXES: TOTAL LEVIES OF AD VALOREM GENERAL PROPERTY TAXES OF STATES, COUNTIES, AND MINOR CIVIL DIVISIONS

NOTE.—The data represent the total levies of general property taxes of States, counties, cities, villages, towns, townships, school districts, etc., and for all purposes. They do not cover "special assessments" on property benefited by specific improvements nor special property taxes applying only to limited classes, nor taxes based on other standards than property, such as income, volume of business, inheritance, etc., which have been steadily growing in relative importance. The change in buying power of money affects materially the comparability of the figures. For data for 1870 and 1890, by States, see Table 437, Statistical Abstract of 1922

No. 198.—ASSESSED VALUATION OF PROPERTY SUBJECT TO GENERAL PROPERTY TAX, 1931

NOTE.—Data shown are taxable values of property subject to the general property tax for the use of State governments. Property belonging to railroads, telegraph companies, and a number of similar corporations is in some States distinguished as real or personal, but in a number of States it is treated as a single total. In the latter case, figures for such corporations and also other property and franchise valuations of corporations for which data were insufficient for a complete distinction of real from personal are not shown separately but are included in the totals.

No. 201.—REVENUES AND EXPENDITURES OF STATE GOVERNMENTS

NOTE.—Both receipts and expenditures are net figures, excluding temporary and special transactions which represent virtually duplication. Revenue receipts do not include any receipts from borrowing of money. Outlays, which enter into the total for governmental-cost payments, represent capital investments, including those made with the proceeds of borrowed money. The excess of governmental-cost payments over revenue receipts represents, approximately, increase of indebtedness.

¹ Prior to 1925, contingent or special assessment debt was included with funded and fixed debt. In this table, it has been excluded from funded and fixed and included with current debt, except for 1880, 1890, 1905, and 1910, when no segregation could be made.

² Includes special assessment debt, revenue bonds and notes, and warrants.

³ Not segregated prior to 1915; included with funded and fixed

⁴ Revised figures

⁵ There was an excess of sinking fund assets over gross debt in one State.

⁶ Debt to public trust funds included with "Other floating."

No. 208.—FUNDED, FLOATING, AND SPECIAL ASSESSMENT DEBT AT CLOSE OF YEAR: BY PURPOSE FOR WHICH INCURRED, 1931

NOTE.—All figures in thousands of dollars. The classification by purpose for many States is more or less imperfect owing to defective records of these States. The column "Other general purposes" includes, besides special assessment indebtedness and debts which from their nature were not assignable to any of the specific classes shown, debt for which the purpose of issue could not be determined.

No. 219.—STOCK OF MONEY IN THE UNITED STATES, BY KINDS

NOTE.—Amounts in thousands of dollars. Figures prior to 1890 have been revised from the best available data, but the older records, especially from 1860 through the early 70's, are not complete and figures for gold and silver those years are only estimates. Figures beginning 1890 have been compiled on the basis of revised figures for June 30 of each year and therefore differ slightly from the monthly circulation statements. In 1927, data were revised to include minor coins beginning 1900 (no satisfactory data available for earlier years) and gold coin and bullion held abroad for Federal reserve banks and to exclude earmarked gold. Gold and silver certificates and Treasury notes of 1890 are not shown, since equivalent amounts held in trust against them are included in gold coin and bullion and silver dollars

No. 220.—MONEY IN CIRCULATION, HELD IN TREASURY AND IN FEDERAL RESERVE SYSTEM, AND TOTAL STOCK

NOTE.—All figures except per capita in thousands of dollars. In conformity with revisions in the form of circulation statement in 1922 and 1927, figures for 1915 on have been compiled to include in the holdings of Federal reserve banks and agents, and, hence, in stock of money, gold bullion and foreign coin held by them and gold coin and bullion held abroad for the account of Federal reserve banks, and also to include in the holdings of Federal reserve banks and agents, and, hence, exclude from circulation, all forms of money held by them whether as reserve against Federal reserve notes or otherwise. As to other revisions, see headnote, Table 219. Per capita figures are on basis of population estimates of the Treasury Department

¹ Both of these items include also reserve against Treasury notes of 1890. The first should be deducted from the totals for money held in the Treasury before combining them with total money outside of the Treasury to arrive at the stock of money in the United States.

² Includes total stock of silver dollars and subsidiary silver.

³ Based on Treasury estimates of population revised in accordance with 1930 census enumeration.

¹ Where 2 or more districts changed their rate during a given month, the days of the month when the rates became effective are given in parenthesis in the order in which the districts concerned are amended; for example, in January, 1922, the rate of 5 per cent became effective for Minneapolis on the 11th, and for Dallas on the 9th; of 4½ per cent for San Francisco on the 23d.

² 5 per cent on 6-9 month agricultural and livestock paper from Apr. 7, 1923, to June 11, 1924, inclusive.

³ 5 per cent on 6-9 month agricultural and livestock paper from Apr. 19, 1923, to June 25, 1924, inclusive; 4½ per cent on 91-day to 6-month agricultural and livestock paper from June 19 to June 25, 1924.

⁴ Rate changed to 5 on Nov. 1 and 4½ on Nov. 15.

⁵ Rate changed to 2½ on Oct. 10 and 3½ on Oct. 17.

⁶ Rate changed to 2½ on Oct. 9 and 3½ on Oct. 16.

No. 242.—ALL REPORTING BANKS: NUMBER, RESOURCES, CAPITAL AND SURPLUS, AND DEPOSITS FOR EACH CLASS OF BANKS

NOTE.—Banks in Alaska, Hawaii, Puerto Rico, and Philippine Islands are included. Data for national banks and in recent years for other classes are as of June 30 or about June 30. In earlier years reports for banks other than national were of various dates. Figures for private banks, which include only those under State supervision and others voluntarily reporting, except for 1880, and for other banks except national for earlier years, especially 1875, 1880, and 1885, are incomplete. Prior to 1910, figures for State banks include stock savings banks and loan and trust companies in a number of States, and in some instances private banks. Deposits exclude interbank demand deposits and U. S. deposits; they also exclude dividends unpaid and, beginning 1910, certified and cashiers' checks, items at one time included in original figures for demand deposits, they include postal savings

[All figures, except number of banks, in millions and tenths of millions of dollars]

¹ See footnote, Table 241.² Capital only.³ Estimated.⁴ Figures for State banks and private banks revised.⁵ In 1921 returns from California, which in 1920 had shown 106 stock savings banks, included all banks except 1 mutual savings bank with State banks, which accounts for part of the increase in State banks and the greater part of the decrease in stock savings banks. In subsequent years returns showed separate statistics for each class of banks.⁶ Average for all private banks for the 6 months ended May 31, 1880, as reported to the Commissioner of Internal Revenue for taxation purposes.⁷ Stock savings banks included with mutual savings banks or State banks in 1880 and 1885. For deposits in savings banks for earlier years, see Table 254, p. 244.⁸ Figures given under "Capital and surplus" are surplus funds only.

No. 251.—CERTAIN MAJOR ITEMS OF SAVINGS OF THE UNITED STATES

NOTE.—In millions of dollars. Increase in savings and other time deposits is for fiscal years ended June 30, increase in assets of building and loan associations includes figures for calendar years for some States and fiscal years for others; other data are for calendar years. The last column should not be added to other items, as there is much duplication between it and them. For example, savings banks and life-insurance companies both invest their assets in the securities of corporations. On the other hand, many forms of savings, some of large amount, are not listed.

No. 254.—SAVINGS BANKS: NUMBER OF DEPOSITORS AND AMOUNT OF SAVINGS DEPOSITS, CONTINENTAL UNITED STATES, 1820 TO 1910

NOTE.—Data for later years are as of June 30 or about June 30. In earlier years reports were of various dates. Prior to 1900 data include both mutual and stock savings banks; beginning 1900 they are for mutual savings banks only, which in that year had about 90 per cent of the savings deposits in all savings banks. For figures for later years and also savings deposits in all classes of banks, see Table 252.

No. 261.—FEDERAL LAND BANKS: PRINCIPAL ASSETS AND LIABILITIES AS OF DECEMBER 31

NOTE.—Under an amendment to the farm loan act approved January 23, 1932, the Secretary of the Treasury subscribed to additional stock of Federal land banks during 1932 in the amount of \$125,000,000. Of this total, it was provided that \$25,000,000 should be used for supplying banks with funds for the purpose of granting extensions to borrowers. At the close of 1932 extensions amounting to \$23,419,800 had been granted to 93,093 borrowers

No. 270.—CLEARING HOUSE EXCHANGES: SUMMARY FOR UNITED STATES

NOTE.—Prior to 1920 data are for all cities reporting to the New York Clearing House Association; commencing 1920 they are for 166 identical cities. The comparability of these figures is affected (1) by changes in the number of cities reporting, and (2) by the tendency toward consolidation of banks, eliminating former clearings between two or more banks. Debits to individual account (Tables 271 and 272) are a more significant measure of volume of payment. The divisions shown in this table, with the exception of the New England, differ from the geographical divisions shown in most tables in the Abstract. The Eastern division includes the States comprising the Middle Atlantic division in other tables (see for example Table 247) and Delaware, Maryland, and District of Columbia of the South Atlantic division; the Southern includes the other six South Atlantic States, the East South Central and the West South Central States with the exception of Oklahoma, the Middle Western includes the East North Central States, Minnesota, Iowa, and Missouri; the Western, North Dakota, South Dakota, Nebraska, Kansas, Oklahoma, Montana, Wyoming, and Colorado; the Pacific, Washington, Oregon, California, Idaho, Utah, Nevada, and Arizona.

12. WEALTH

(Data in this section relate to continental United States)

No. 274.—ESTIMATED NATIONAL WEALTH OF THE UNITED STATES: TOTAL, 1850 TO 1922, AND BY CLASSES OF PROPERTY, 1900 TO 1922

NOTE.—Estimates of national wealth for the earlier censuses were not made by precisely the same methods used more recently and are not closely comparable. Changes in buying power of money, as indicated by levels of prices and wages, materially affect the comparisons (see price tables in sec. 14). For distribution of principal classes of property by States for 1912 and 1922, see Statistical Abstract, 1932, Table 275. There have been no official estimates of wealth since 1922.

No. 275.—WEALTH: ESTIMATED VALUE OF ALL TANGIBLE PROPERTY SITUATED IN EACH GEOGRAPHIC DIVISION AND STATE

NOTE.—See headnote to Table 274. This table shows, not the value of property owned by the citizens of each State, but that of the physical property lying in each State wherever the securities or other evidences of title representing it may be found or owned. The per capita figures thus do not represent the average wealth of the citizens of each State

¹ Total differs from estimate as published in 1912 because of revision of estimate for taxed real property in Oklahoma. Includes \$402,000,000 value of ships belonging to the United States Navy and \$290,000,000 value of privately owned water-supply systems not distributed by States. Items for geographic divisions and States differ from estimate as published in 1912 because of redistribution of railroad values in accordance with the method employed in 1922.

² Total includes \$1,446,000,000 value of ships belonging to the United States Navy, \$361,000,000 privately owned water-supply systems, and \$4,278,000,000 gold and silver coin and bullion not distributed by States.

³ Includes Indian Territory.

No. 283.—FIRE LOSSES: TOTAL AND PER CAPITA, CONTINENTAL UNITED STATES

NOTE.—Amounts, except per capita, in thousands of dollars. Prior to 1916, figures are as compiled by the New York Journal of Commerce and include losses of \$10,000 or over in the principal cities of the United States, adding 15 per cent for small and unreported losses. These figures are not comparable with those shown for later years (the 1916 Journal of Commerce figure being \$214,531,000 as against \$258,378,000) which cover all fires reported to the Actuarial Bureau Committee, adding 25 per cent for unreported and uninsured losses

No. 287.—LIFE INSURANCE: ORDINARY AND INDUSTRIAL INSURANCE WRITTEN AND IN FORCE, BY STATES

NOTE.—Totals in this table do not agree with totals in Tables 284 to 286 because of differences in the reports from which they are compiled as furnished by the companies to the various insurance departments, and because of duplications from reinsurance. The former also covers business transacted in continental United States only, while the latter include also foreign business of United States companies

No. 295.—CAPITAL ISSUES: SUMMARY, BY CLASSES, 1919 TO 1932

NOTE.—In millions and tenths of millions of dollars. Data cover domestic and foreign issues in the United States. Preferred stocks of no par value and all common stocks are taken at their offering price, other issues at par, except that in the figures for corporate issues for 1910 to 1918 all stocks are included at their market value. Corporate issues for 1911 to 1918 exclude real estate offering and privileged stock subscriptions included in figures beginning 1919, and issues of less than \$100,000. State and municipal issues include bonds issued by States, Territories, and possessions, counties and municipalities, and by school and road districts and other independent governmental bodies.

¹ Average of Saturday closing prices for these stocks.

² Computed from the yields on the average prices of the selected bonds for each day of the month, the average yield being capitalized at 4 per cent to give the combined index.

³ Average market yield of bonds of 20 large cities at the end of each month since Jan. 31, 1917, previous figures are for the first of the month.

14. PRICES

GENERAL NOTE—The wholesale price index of the Department of Labor is based on primary market quotations of 784 commodities beginning 1926, a smaller number of commodities was covered in earlier years. In weighting the prices included in the index, the biennial census reports of 1923 and 1925 have been used for most manufactured products and for other products the average for the years 1923 to 1925 where trustworthy information was available as in the case of agricultural products. Beginning with 1921, in computing indexes for commodity groups, articles falling under more than one of the classifications adopted were included under each classification. For example, articles produced on the farm which reach the consumer practically unchanged in form, such as potatoes, milk, and eggs, were included among both farm products and foods. However, in computing the index for all commodities such articles were counted only once.

The retail food index is based on the weighted average quotations (weighted by average family consumption in 1918) as of the 15th of the month, secured from retail stores in 51 cities since 1920 (from a smaller number in earlier years) for 22 commodities from 1913 to 1920, for 43 commodities from 1921 to 1928, and 42 thereafter.

The farm price index is constructed by weighting prices paid to producers for 27 products (30 products for 1922 to 1925). Average quotations for the period, August, 1909–July, 1914, are used as a base, and each price series is weighted by the average annual marketings of farmers in the years 1918 to 1923.

No. 315.—ANNUAL AVERAGE UNIT VALUES OF IMPORTANT ARTICLES IMPORTED INTO THE UNITED STATES

NOTE.—The values are required by law to represent the values of the goods in the foreign markets whence exported to the United States. "Ton" signifies long ton of 2,240 pounds.

The averages are obtained by dividing the total value of imports of the specified article by the total quantity, and as in some commodities there may be considerable variations in price between different grades, methods of packing, etc., and as the proportions of the grades, etc., may vary from year to year, the averages in such cases may show the actual price movements only roughly.

15.—WAGES, HOURS OF LABOR, AND EMPLOYMENT

[For data relating to hours of labor and wages shown in other sections, consult the index]

No. 316.—INDEX NUMBERS OF WAGES PER HOUR (EXCLUSIVE OF AGRICULTURE)

NOTE.—These index numbers are based on such information as afforded comparisons through a series of years. No one series of directly comparable data extends through the entire period, although many trades and industries are continuously represented in the table. Agricultural wages are not included in the indexes given in this table, but are presented separately in Table 530, this separation was made because of the seasonal character of the industry, the wide differences in methods of hiring, and the perquisites so often forming a part of the farm wages. The figures in this table indicate the change in earnings per hour when wage workers were actually at work, with 1913 as the base year. During the period, regular full-time working hours have been greatly reduced, hence the figures do not apply to full-time earnings per day or per week. Further, they do not reflect actual earnings in periods of broken time or unemployment.

No. 317.—INDEX NUMBERS OF WAGES PER HOUR, COST OF LIVING, AND REAL WAGES

NOTE.—The general trend of wages per hour presented in Table 316 relate to the money received per hour by the wage earner as compensation for his work. The real measure of his wage, however, is not his money income, but what he is able to buy with it. In the following table, therefore, index numbers relating to wages per hour and to cost of living are brought together and from them a third index number is computed showing the change in the worker's "real wage."

¹ The normal or customary hours of operation of the great majority of the potteries included in the study are 9 hours per day and 54 hours per week. Working hours in a pottery, however, are more nominal than normal, as so many employees are pieceworkers and to quite an extent determine their own time.² No females employed in the plants covered.³ Actual flight hours in one month⁴ Per hour of actual flight regardless of hours on duty⁵ Per hour on duty regardless of hours of actual flight.

No. 321.—WAGES PER HOUR AND HOURS OF LABOR PER WEEK IN MINING INDUSTRIES

NOTE.—Nearly all coal mines operate on a 48-hour week, but contract miners and their laborers in anthracite mines, and loaders, hand or pick miners, and machine miners in bituminous mines, generally work less hours. General averages are weighted according to relative importance of the different occupations. Data are not collected annually, but at intervals, and are available only for the years specified.

No. 322.—AVERAGE HOURLY WAGE RATES PAID COMMON LABOR

NOTE.—Rates in cents per hour. Data are based on entrance rates paid unskilled adult males in important industries requiring considerable numbers of common laborers. Some establishments reported two rates—one for the 10-hour and one for the 8-hour day, or one for white and one for colored or Mexican workers, these distinctions have not been maintained in the tabulated data, although it is apparent that the lowest rates are shown for those geographic divisions where there are large numbers of colored or Mexican workers, and the highest, for localities where an 8-hour day is more or less prevalent.

No. 325.—EMPLOYMENT AND PAY-ROLL INDEXES IN MANUFACTURING INDUSTRIES

NOTE.—Monthly average 1926=100. Indexes for 1931 and 1932 cover 89 industries (for most important of which see Table 327) and in 1932 are based on returns from 18,000 establishments employing approximately 2,550,000 persons, indexes for January, 1926, to September, 1929, cover 54 industries, indexes for October, 1929, to December, 1930, have been adjusted for the expansion from 54 to 89 industries. Returns cover one pay period ending on or about the 15th in each month. Indexes are weighted according to relative importance of the industries included, they are without seasonal adjustment. ¹ Compiled by the Massachusetts Department of Labor and Industries, Division of Statistics, from about 1,000 firms each month. Data are connected by the chain relative method.

² Compiled by the New York State Department of Labor from reports of approximately 1,500 establishments prior to 1930, 1,850 in 1930, and 1,700 thereafter. These establishments employed more than one-third of the factory workers of the State.

³ Compiled by the Federal Reserve Bank of Philadelphia from reports of about 800 plants in New Jersey and about 850 in Pennsylvania. Since August, 1926, figures for New Jersey are from the New Jersey Department of Labor.

⁴ Compiled by the Illinois Department of Labor from reports of manufacturing establishments, based on the pay roll nearest the 15th of the month.

⁵ Compiled by the Industrial Commission of Wisconsin, from reports of about 850 manufacturing establishments.

⁶ Index number represents 11 months' average; no data reported for June.

⁷ Index number represents 6 months' average, July to December, inclusive.

No. 333.—INDEX NUMBERS OF UNION HOURS OF LABOR PER WEEK AND RATES OF WAGES PER HOUR, BY OCCUPATIONS

NOTE.—Data cover the principal cities of the United States. The relative hours are percentages showing the change in the regular full-time working hours per week, account not being taken of loss of time from slack work or other causes nor of overtime work. The relative wages are percentages which indicate the change in wages per hour. The figures are based on the scale prevailing May 15 each year. For absolute hourly wage rates for the same and other occupations, see Table 334

¹ Not counting rural free delivery routes.

² Audited postal surplus or deficit which is greater or less than excess of receipts or expenditures by the amount of adjusted losses and contingencies.

³ International includes foreign countries on domestic basis. For explanation see headnote Table 337.

⁴ Data are for continental United States and are estimates except in 1923 and beginning with 1926, when figures are accurate calculations. No estimates made from 1914 to 1922, inclusive.

⁵ Postage stamps first issued under act of Mar. 3, 1847, and placed on sale at New York July 1, 1847.

⁶ From Nov. 1, 1864, when money-order system first went into operation, to June 30, 1865.

⁷ From Sept. 1, 1869, to June 30, 1870. International money orders first issued under convention of Oct. 12, 1867.

⁸ Gross revenues of department for 1918 and 1919 include \$44,500,000 and \$71,292,000, respectively, war-tax revenue accruing from increased postage.

No. 337.—POSTAL MONEY-ORDER BUSINESS: YEARS ENDED JUNE 30

NOTE.—For revenues from money orders, see Table 336. For value of orders issued for other years, see Table 335. Money orders are exchanged on a domestic basis not only within this country, but with its outlying possessions, Canada, Cuba, and numerous islands and minor countries neighboring the United States. International-basis orders are exchanged between the United States and its outlying possessions, on the one hand, and other than "domestic basis" foreign countries, on the other. In this table, however, "International" includes money orders exchanged between the United States and "domestic basis" foreign countries, and these are not included in "Domestic."

No. 339.—TRANSPORTATION OF DOMESTIC MAILS

NOTE.—Amounts, except as indicated, in thousands of dollars. Since Nov. 1, 1916, all service on steam railroads is authorized and paid for under the space basis system, formerly, payments were based on a system of quadrennial weighings. Railway mail space units of service vary in size and character and may consist of a car, a section of a car, or a closed pouch carried on a car. Some cars are railway post offices, others are for storage only, over 20 classes of units being distinguished. The "equated unit" represents a calculation of the equivalent of all the different units in terms of a 60-foot car. Annual rate of expenditure (regular authorizations) represents estimated cost for transporting normal mail traffic over regular routes only, based on contracts outstanding at the end of each fiscal year. "Annual cost" includes emergency and side and transfer service. Average rates are based on "regular authorizations".

No. 347.—TELEPHONE SYSTEMS: REPORTS TO INTERSTATE COMMERCE COMMISSION

Note.—Companies engaged in interstate business are required to report both as regards interstate and intrastate business. Prior to 1923 the classification of companies based on the amount of annual operating revenues was as follows: Class A, over \$250,000, Class B, \$50,000 to \$250,000, Class C, \$10,000 to \$50,000. Class B now includes companies with revenues from \$100,000 to \$250,000 and Class C those with revenues from \$50,000 to \$100,000. The smaller companies, Class D, are not covered in the table.

² Not including land-line-system plant and equipment to the value of \$20,000,000 reported as cable-system plant and equipment for 1912 and 1917. (In statistics for preceding censuses an item of \$20,000,000 funded debt, offset by the same amount for plant and equipment, was carried against ocean-cable telegraphs. This debt being really a land-line-system debt, is eliminated from the figures for ocean-cable system in 1922 and 1927.)

¹ The fuel equivalent for water power is calculated from the reported horsepower of installed water wheels. Prior to 1890 data were unsatisfactory, but estimates are included in the total.

² Calculated at 26,200,000 British thermal units per ton.

³ Based on the amount of coal displaced by gas, as estimated by the gas companies at the time.

No. 356.—ELECTRICITY PRODUCED, CONSUMPTION OF FUEL, AND CAPACITY OF GENERATORS IN PUBLIC-UTILITY POWER PLANTS

NOTE.—Data prior to 1919 are totals for central stations and electric railways as reported by Bureau of the Census; thereafter, they are estimated totals for all plants, based on returns from about 3,500 plants in 1919 to about 3,900 in 1932, each producing 10,000 kilowatt-hours or more per month, engaged in public service, including central stations, electric railways, steam railroads generating electricity for traction, and certain other plants. The capacity of plants reporting is about 95 per cent of that of all plants

No. 359.—CENTRAL ELECTRIC STATIONS: EQUIPMENT, EMPLOYEES, OUTPUT AND SALES

NOTE.—A central electric station is one selling current to public or private consumers, or a municipal plant supplying current for streets, public buildings, etc. Isolated or private plants operated solely for the benefit of the owner in connection with factories, mines, stores, hotels, institutions, etc., which in the aggregate produce great quantities of current, are not included. The business of electric street railways is shown only so far as that portion of their business relating to the sale of current can be segregated. Electric plants operated by the Federal or State Governments are excluded even when they sell current to private consumers. One central electric station often sells current to another, so that there is considerable duplication in total sales. Net sales are considerably less than current generated because of wire losses, self consumption, etc.

¹ The term "station" as here used may represent a single electric station or a number of stations operated under the same ownership.

² Figures not available.

³ Salaries and wages were not reported for 1927 by municipal plants. Commercial plants reported 95,917 salaried employees, with salaries amounting to \$166,341,000, and 138,796 wage earners, with wages amounting to \$201,291,000. The percentages which the salaried employees and wage earners reported by the commercial plants formed of the corresponding totals for both commercial and municipal plants were 94.6 and 92.8, respectively.

No. 364.—DEVELOPED AND POTENTIAL WATER POWER

NOTE.—In thousands of horsepower. Data for developed water power cover capacity of actual installation of water wheels and turbines in plants of 100 horsepower or more. The figures for potential power are estimates showing the 24-hour horsepower available 90 per cent of the time and 50 per cent of the time at an over-all efficiency of 70 per cent at all developed and undeveloped sites. These figures for potential power are not directly comparable with those for developed power, because developed power is usually given in terms of the capacity of installed water wheels or turbines, which may be several times the potential power available 90 per cent of the time. Probably with complete development of the water-power resources of the whole country the installed capacity would amount to 80,000,000 horsepower or more.

19.—PUBLIC ROADS AND MOTOR VEHICLES

No. 365.—RURAL ROADS IN THE UNITED STATES

NOTE.—Mileage data included for county and township roads in 1921 and 1926 were secured from county records, data for other years shown in this and subsequent tables contain some estimates and are not as accurate as to detail. Data in most cases refer to calendar years; there are, however, exceptions in some States. Data relate to continental United States only, except as noted.

No. 366.—RURAL ROAD MILEAGE AS OF DECEMBER 31

NOTE.—Data include all rural roads. In some cases variations in mileage from that of the previous year shown are partly because of more accurate survey of road mileage. Data in most cases relate to December 31, there are, however, some exceptions. Data for local roads for 1931 are not yet available. For mileage of State highway systems as of Dec. 31, 1931, see Table 368.

No. 372.—PRODUCTION AND REGISTRATION OF MOTOR VEHICLES

NOTE.—Figures for earlier years are largely estimates. Beginning with 1921, data include production of plants located in Canada, making motor vehicles of United States design, and cars assembled in foreign countries from American parts, figures represent factory sales for United States plants and production for Canadian plants. Motor cycles and trailers are not included.

¹The figures for 1921 are based only on price of 5-passenger open cars of a given chassis. Thus, if this model sold for less than \$1,000, the total production of cars with the same chassis is included in the "under \$1,000" class, even though closed models sold for over \$1,000. In 1922 and later years actual f. o. b. prices of open and closed models are considered separately and the cars included under proper classification.

20.—TRANSPORTATION AIR AND LAND—STEAM AND ELECTRIC RAILWAYS, EXPRESS COMPANIES, AND CIVIL AERONAUTICS

[Data in this section relate to continental United States unless otherwise stated]

GENERAL NOTE.—The total steam railroad mileage of the United States includes (a) Regular interstate carriers (and their nonoperating subsidiaries) reporting to the Interstate Commerce Commission, (b) switching and terminal railroads, also reporting to the commission, and (c) private railroads (defined by the commission as "circular" because they report on brief circulars and as "unofficial"). Except in certain mileage data the circular and unofficial companies are not included in any of the statistics. The switching and terminal roads were formerly included with operating railways, but are now separated, and data for them do not appear in most of the tables.

Nonoperating subsidiaries include proprietary companies, which are covered by the reports of operating carriers, and lesser companies which have no traffic and whose reports appear only in statistics of capitalization, dividends, and investment.

Operating railways are divided into three classes, according to the amount of gross operating revenue in 1919: Class I, having more than \$1,000,000 of such revenue, Class II, from \$100,000 to \$1,000,000, and Class III, less than \$100,000. During recent years more detailed reports are required from Class I carriers than from smaller companies. The basis of the figures in each table is indicated by notes. Omission of Class II and Class III railroads affects very little the comparability of statistics with those of earlier years as regards most items, since the bulk of the business is done by Class I.

The Interstate Commerce Commission divides railroads geographically into three districts and eight subsidiary regions. Each railroad is treated as a unit and placed wholly in some one district or region. Broadly speaking, the eastern district includes territory east of Chicago and north of the Ohio and Potomac Rivers; southern district, territory east of the Mississippi River and south of the Ohio and Potomac Rivers; and western district the remainder of the country.

Class I companies make monthly reports and the yearly totals from these become available earlier than the sometimes slightly corrected totals from the final annual reports. The latest figures in these tables are in many cases from the monthly reports.

No. 380.—RAILWAY MILEAGE OWNED AND MILEAGE OPERATED CLASSIFIED BY TRACKAGE

NOTE.—Beginning with 1908 switching and terminal roads are omitted (they operate about 2,000 miles of first main track). The first and second columns cover all railways including "circular" and "unofficial" lines, the last five columns omit "circular" and "unofficial" lines. Mileage owned excludes all duplication and covers continental United States only. Mileage operated includes some duplication under trackage rights and some mileage in Canada operated by United States companies.

¹ Data exclude switching and terminal companies beginning 1910. Class III roads are excluded in 1913. Exclusion of the latter has practically no effect on the comparability of the figures. Information for 1915 is incomplete, as 20 of the larger railways did not report, and is not shown.

² Calculated for all classes of employees, including those not paid on an hourly basis.

³ Data cover Federal reports, reports of companies not under Federal control, and corporate reports.

⁴ Estimated from data for Class I roads.

No. 391.—CAPITALIZATION OF RAILROADS: ALL REPORTING COMPANIES

NOTE.—All amounts except "per mile of road" in millions of dollars. Switching and terminal companies excluded beginning with 1910, their total capitalization in 1931 was \$775,663,816. Figures include both operating and nonoperating railways. The gross figures include considerable amounts of securities held by the companies issuing them as well as larger amounts held by other railway companies

No. 392.—RAILWAY STOCK OUTSTANDING, DIVIDENDS, AND INTEREST

NOTE.—Data relate to years ending June 30 prior to 1916 and to calendar years thereafter. Nonoperating as well as operating roads are included. Switching and terminal roads are excluded beginning with 1908. Dividend figures throughout cover all classes of roads, but interest figure for 1913 excludes the unimportant Class III roads. The amount of stock shown in the first column is exclusive of stock held by the issuing company, but includes that held by other railway companies

No. 394.—PROPERTY INVESTMENT, INCOME, INTEREST, AND DIVIDENDS:
REPORTED BY OPERATING ROADS

NOTE.—All figures, except as indicated, in thousands of dollars. Investment is as reported by the carrier and should not be confused with the tentative valuation fixed by the Interstate Commerce Commission. It relates only to railway property, but includes leased lines, which are not included, however, under the other columns. All data exclude switching and terminal companies.

¹ Prior to 1925 figures include investment of leased lines and exclude investment of proprietary companies which do not render annual reports. Beginning with 1925 the investment in road and equipment of proprietary companies is included as follows: 1925, \$493,922,000; 1926, \$531,574,000; 1927, \$919,095,000; 1928, \$1,013,752,000; 1929, \$1,051,469,000; 1930, \$1,095,630,527; 1931, \$1,114,637,188. In this column no allowance is made for cash and material and supplies, and no deduction is made for depreciation.

² Investment originally published is increased by \$170,000,000, estimated reserve for depreciation.

³ Does not include returns for Class II and Class III companies.

⁴ Figures not comparable on account of Federal control accounting requirements.

No. 395.—FREIGHT TRAFFIC: TRAIN AND CAR MOVEMENT

NOTE.—Figures prior to 1916 relate to years ended June 30, thereafter to calendar years. Switching and terminal roads excluded beginning with 1908. The tonnage "per loaded car" for "All roads" is based on revenue tonnage only; and for "Class I roads" on revenue and nonrevenue tonnage, with exception of the "District" figures for 1916-1920. Tons are of 2,000 pounds

No. 399.—REVENUES, EXPENSES, AND INCOME OF OPERATING COMPANIES

NOTE.—Data relate to years ended June 30 prior to 1916, to calendar years thereafter. The method of calculating net revenue and net operating income is more fully shown in Table 400. Switching and terminal companies are excluded beginning with 1908, operating revenues of switching and terminal companies, 1930, \$92,396,000, 1931, \$71,117,000, operating expenses, 1930, \$71,005,000, 1931, \$56,017,000. For certain principal items for individual years 1890 to 1900, see 1932 Statistical Abstract, Table 411, p. 381.

Class and year or yearly average	Average miles offline (first track) operated	Income account items (thousands of dollars)				Per mile of line		Per cent operating expenses of revenues
		Operating revenues	Operating expenses	Net revenue from operations	Tax accruals	Net railway operating income	Operating revenues	Net revenue from operations

No. 403.—REVENUE FREIGHT CARRIED, BY COMMODITY GROUPS

NOTE.—All figures in thousands of tons of 2,000 pounds. Data relate to years ended June 30 prior to 1916, to calendar years thereafter. Switching and terminal roads excluded beginning with 1908. Figures for 1911 to 1916, inclusive, exclude Class III roads but this affects the comparability very slightly; those after 1916 exclude both Class II and Class III, thereby reducing the grand total about 6 per cent. Non-revenue freight is excluded; this is a large item in the case of a few commodities, notably coal.

Class of road and year or yearly average	Total	Products of agriculture	Animals and products	Products of mines		Products of forests	Manufactures and miscellaneous

No. 406.—PERSONS KILLED AND INJURED IN RAILWAY ACCIDENTS

NOTE.—For various reasons, including the fact that returns were required under different acts, the statistics are not strictly comparable. Prior to 1921, train accidents were those causing damage to railway property in excess of \$150 or any damage and a resulting casualty. Thereafter they were considered as such when the damage exceeded \$150 with or without a casualty. Where the damage is less than \$150 and there is a reportable casualty it is classified as a train-service accident. Figures for years 1911-1915 include industrial and other nontrain accidents to employees only, and for years 1908-1910 do not cover switching and terminal roads. Otherwise the statement covers all reportable accidents.

¹ The ratio of fuel oil to coal is based upon the experience of the various roads; 1 cord of hardwood equals two-thirds ton of coal; 1 cord of softwood equals one-half ton of coal.

² Totals include equivalent of a small amount of miscellaneous fuel.

³ The total charges shown do not include the labor cost of applying the rails or ties.

⁴ Figures do not include data for 156 linear feet of steel ties.

No. 411.—ELECTRIC RAILWAYS: SUMMARY OF OPERATIONS

NOTE.—This table does not include the electric operations of steam railway companies. Many electric railway companies also engage in other operations, especially in the sale of current for light and power; wherever possible, such light and power business has been excluded, but for numerous companies this is impossible. No distinction can be made in the statistics between purely urban street railways and suburban and interurban lines. The insignificant amount of business still conducted by cable and animal traction is included, as well as some operations conducted by primarily electric railways by means of steam traction and gasoline engine cars. In the trackage statistics of this table, each track of a double or multiple line is counted separately. Mileage figures expressed in nearest mile.

¹ Includes companies maintaining separate organizations, though leased to and controlled through stock ownership by other companies, largely in Pennsylvania. In 1907 and 1912 these companies were treated as merged and not included in the number reported.

² Compressed air

³ Includes 1 26 miles of nonelectric track in 1922, 1 20 miles in 1927

⁴ Complete data not available. In 1927 a number of composite companies included the value of electric railway road and equipment in the value of their entire plant and equipment reported on their combined balance sheet on the light and power schedule and advised that this could not be separated. Statistics for Central Light and Power Stations include their combined figures.

⁵ Not including motor-bus passengers.

NOTE.—See headnote to Table 411. The track mileage represents that actually lying in each State, but all ducted in other States. The differences among the States in the relation of passengers carried to of interurban as against purely urban traffic. Data for motor-bus lines represent those operated mileage represents passenger, express, freight, and mail-car mileage. ¹ Mileage expressed in nearest mile. Figures include track lying outside the United States (1907, 28 miles; 1912, 32 miles; 1917, 1922 and 1927, 27 miles)

² Not shown separately.

³ Overhead trolley includes 25 miles of surface lines operated by both overhead trolley and gas-electric motor cars.

⁴ Figures for power-plant equipment, capacity of generators, and output of stations in 1927 are not comparable with those in prior years, as companies that formerly reported these data as auxiliary operations on railway schedules furnished separate and complete reports for light and power operations in 1927. These are included in the statistics for "Central Electric Light and Power Stations." The number of companies that reported power-plant equipment in 1907 was 576; in 1912, 494; in 1917, 355; in 1922, 232 and in 1927, 70.

⁵ Includes 857 units of 43,344 horsepower reported as auxiliary engines in 1907 and 33 units with 41,100 horsepower of idle equipment in 1927.

⁶ No data.

⁷ Not including passengers carried by motor busses operated by electric railway companies (16,120,000 in 1922 and 214,694,000 in 1927).

⁸ Exclusive of idle track and freight and switching roads.

21.—WATERWAYS, WATER TRAFFIC, AND SHIPPING

Data in this section cover the following areas unless otherwise indicated: From Board of Engineers of the United States Army, and Bureau of Foreign and Domestic Commerce, United States customs area which includes Alaska, Hawaii, and Puerto Rico; from United States Shipping Board, continental United States

General note as to units of measurement—"Cargo tonnage" represents weight of cargo in long tons (2,240 pounds) or short tons (2,000 pounds). All other tonnage figures refer to capacity of vessels. The terms gross and net tonnage refer to space measurement, 100 cubic feet being called 1 ton. Gross tonnage is the capacity of the entire space within the frames and the ceiling of the hull, together with those closed-in spaces above deck available for cargo, stores, passengers or crew, with certain minor exemptions. Net or registered tonnage is what remains after deducting from the gross tonnage the spaces occupied by the propelling machinery, fuel, crew quarters, master's cabin, and navigation spaces. It represents substantially space available for cargo and passengers. The net tonnage capacity of a ship recorded as "entered with cargo" may bear little relation to actual weight of cargo. Dead-weight tonnage is the weight in long tons required to depress a vessel from light water line (that is, with only the machinery and equipment on board) to load line. It is therefore the weight of the cargo, fuel, etc., which a vessel is designed to carry with safety. Displacement tonnage (naval vessels) has reference to weight of the vessel itself with its normal equipment, fuel, etc.

¹ Includes the following, with figures for 1931. Harbor traffic of New York, Philadelphia, and San Francisco (40,623,000 tons), local traffic of other seaports (24,469,000), local traffic of lake ports (5,722,000).

² Excluding St. Marys Falls Canal traffic (44,614,000 tons in 1931) and additional Detroit River traffic (21,798,000 tons in 1931), both of which are already counted in Great Lakes traffic, also excluding duplications relating to rivers and canals themselves.

³ Principally coastwise and lake traffic passing through canals and connecting channels, other than the St. Marys Falls Canal and the Detroit River.

⁴ Estimated from data in this table on the assumption that all the duplications deducted from the grand total represent duplications in domestic traffic; there are, however, some minor cases of duplication connected with foreign traffic.

No. 421.—COMMERCE OF PRINCIPAL UNITED STATES OCEAN PORTS, 1931

NOTE.—In thousands of short tons of 2,000 pounds. In addition to the commerce here shown, many of the ports have (1) commerce with ports on internal rivers and canals; (2) purely local port traffic, including in the case of New York, Philadelphia, and San Francisco, what is called intraport traffic between parts of a harbor for which separate statistics are maintained. These forms of traffic, although the aggregate tonnage is large, are of much less economic importance than foreign and coastwise traffic.

¹ Sailing vessels, canal boats, and barges² Dec. 31.³ The decrease of tonnage arises principally from the registered tonnage having been corrected in 1818, 1829, and 1830 by striking off all vessels the registers of which were granted prior to 1815, which were supposed by the collectors to have been lost at sea, captured, etc⁴ Sept. 30⁵ Including Puerto Rico in all years shown and Virgin Islands beginning 1920.⁶ Including Hawaii and Alaska.⁷ Motor vessels included in steam in 1910.

¹ To and including 1921 "Net revenues from business operations" shown in last column are included in "Taxes, licenses, etc." "Total transit revenues," and "Net revenues from transit operations"; therefore the \$480,725 shown under the latter is the net revenue to June 30, 1921, from all operations. In the adjusted total this item is transferred to "Surplus from business operations" by deducting from the amount shown in this column \$379,862, which is added to "Business expenses." To "Business revenues," and to "Surplus from business operations," is also added \$619,585 interest on public works in Panama and Colon received prior to June 30, 1921, but not taken up as a canal revenue.

No. 452.—PRODUCTION OF EXPORTABLE GOODS AND PROPORTION EXPORTED

NOTE.—Agricultural production prior to 1909 is the estimated value of farm products, excluding crops fed to livestock, beginning 1909 it is gross income, excluding feed, seed, and waste. Value added by manufacture represents manufactures. Value of mine products in 1909 and 1919 are census figures, in 1929 census data plus petroleum products, while estimates for other years are based on data of the Bureau of Mines. As the figures are not adjusted for price changes the increase or decrease in absolute values from period to period should be disregarded.

No. 454.—INDEXES OF CHANGES IN QUANTITY, UNIT VALUE (PRICE), AND TOTAL VALUE OF EXPORTS OF UNITED STATES MERCHANDISE AND GENERAL IMPORTS

NOTE.—The purpose of these indexes is to eliminate the effect of price changes upon the total value of trade. They have been constructed by the so-called ideal formula, the essential feature of which is the use of the quantities of the several articles for each pair of years compared as weighting factors of their unit values. About 265 commodities were included in the direct calculations for exports and 160 in those for imports. It was then assumed that the price movement for commodities not included in the calculation was the same as for those selected. For exports, the value of each economic class was adjusted by the computed price index for that class and included in the aggregative totals from which the quantity indexes were calculated. For imports, it was assumed that the prices of articles not covered had moved as those covered save only that in making the adjustment the effect of abnormal price movements of heavily weighted commodities was first eliminated. In constructing the indexes the data for 1919 were linked directly to 1913 and each subsequent year was compared with that preceding. The resulting year-to-year percentages were made into a series by the chain method.

No. 455.—GOLD¹ UNDER EARMARK FOR FOREIGN ACCOUNT IN THE UNITED STATES

NOTE.—All figures in thousands of dollars. Gold under earmark is gold placed by a bank in the custody of its foreign correspondent but segregated and marked so as to indicate that the identical coins or bars earmarked are the bank's property and altogether subject to its disposal. The first transaction occurred Mar. 21, 1916. Amount under earmark at the end of December, 1916, was \$6,097,000 and at the end of December, 1917 and 1918, \$6,942,000.

No. 456.—MERCHANDISE TRADE OF CONTINENTAL UNITED STATES WITH FOREIGN COUNTRIES AND OUTLYING TERRITORIES AND POSSESSIONS

IMPORTANT NOTE.—This table differs as to its geographic basis from all other foreign trade tables in this section and in other publications. (1) In the case of other tables the data represent the trade of the "customs area," which includes continental United States, Alaska, Hawaii, and Puerto Rico, with all foreign countries, including the Philippine and Virgin Islands. The data do not cover trade between continental United States and the three territories of Alaska, Hawaii, and Puerto Rico. (2) The present table takes continental United States as the basis. In the totals, trade between it and Alaska, Hawaii, and Puerto Rico is included while the trade of these three Territories with foreign countries is excluded. Trade of continental United States with Guam and American Samoa is also included. Practically all other nations calculate their foreign trade in the manner followed in the present table; that is, totaling the trade of the home country with foreign countries and with all outlying areas. Prior to 1901 Alaska was our only outlying area. Therefore, our foreign trade statistics for 1900 and earlier years very nearly represent the trade of continental United States with foreign countries. Data are for years ended June 30, through 1918; thereafter, for years ended Dec. 31.

No. 461.—PER CAPITA EXPORTS AND IMPORTS OF MERCHANDISE

NOTE.—Export figures for 1791 to 1820 are based on total exports including reexports (the latter were then relatively large) and for 1821 to date, on exports of United States merchandise only, shown in Table 457. Import figures for 1791 to 1820 are based on general imports shown in Table 457, for 1821 to 1870, total imports less reexports, and for 1871 to date, imports for consumption, shown in Table 462.

No. 462.—IMPORTS ENTERED FOR CONSUMPTION AND DUTIES THEREON

NOTE.—From 1821 to 1866, inclusive, the figures of import values represent total imports less reexports, and for 1867 and later years imports entered for consumption. The "ratio of duties to total" is based upon the values of imports, shown in the table. Figures cover fiscal years ended Sept. 30, 1821 to 1842, and June 30, 1843 to 1915; calendar years thereafter

No. 465.—SUPPLEMENT TO TABLE 464: FREE AND DUTIABLE GENERAL IMPORTS OF MERCHANDISE ADJUSTED FOR VALUES OF WHEAT AND WOOL, CLASSIFIED AS DUTIABLE BUT ENTERED FREE UNDER SPECIAL PROVISIONS, 1925 TO 1932

NOTE.—All figures in thousands of dollars. Since 1922 there is an understatement of the value of free goods in the figures for general imports resulting from the following facts: (1) Wheat imported (practically all coming from Canada) for 1922 to 1928 was all reported as dutiable when first entered, but most of it was subsequently used for milling-in-bond for export and in that case no duty is collected, (2) carpet wool for 1922 to 1932 was nearly all reported as dutiable when first entered but most of it is subsequently used for making carpets in which case no duty is collected. These shifts affect the general total and the totals for the economic classes of crude materials, and crude foodstuffs in Table 464. The following table shows for these classes approximately the proportions free and dutiable since 1934 after adjusting for these shifts. It also shows approximate adjusted figures of free and dutiable imports from Canada. The shift of carpet wool from dutiable to free likewise affects somewhat the proportions free and dutiable in imports from countries supplying carpet wool (principally United Kingdom, China, Argentina, Chile, and India), but no adjustments have been made for such countries or for continent totals. See Table 526 of the 1930 Statistical Abstract for adjustments for 1922, 1923 and 1924

No. 469.—SUPPLEMENT TO TABLES 467, 468, AND 474: ADJUSTED FIGURES OF EXPORTS TO CANADA, NORTH AMERICA, NORTHERN NORTH AMERICA, AND EUROPE

NOTE.—Especially from 1920 through 1929 large quantities of United States grain were shipped through Canada (mostly via Montreal) to other foreign countries. Since the final destination is customarily not known when shipped, this grain is reported as an export to Canada, but as a matter of fact practically all of it except from five to ten million dollars' worth of corn annually goes thence to Europe. In the following table the reported figures of total value of exports are adjusted on the assumption that all this grain was destined for Europe, an assumption adopted for convenience and involving only a small margin of error. Figures cover fiscal years for 1910-1914; calendar, for all other years

No. 474.—EXPORTS (INCLUDING REEXPORTS) AND GENERAL IMPORTS OF

NOTE.—In the case of some countries, especially those having no seaports, there is considerable indirect imports from them; for such countries the apparent balance of trade may be far from the true balance. Adjusted figures taking account of this movement are given in Table 469. Figures for 1910 to 1914

No. 475.—EXPORTS (INCLUDING REEXPORTS) AND GENERAL IMPORTS OF MERCHANDISE, BY GROUPS OF CUSTOMS DISTRICTS

NOTE.—Fiscal years to and including 1915; thereafter, calendar years. All figures except export figures for 1865 and 1870-1878 represent specie values, exports for those years represent mixed gold and currency values and hence do not agree with the specie values given for total exports in other tables. Exports and imports of the interior districts, a small percentage of the total, are not included in this table. See annual volumes of Foreign Commerce and Navigation for data for each customs district.

No. 476.—EXPORTS (INCLUDING REEXPORTS) AND GENERAL IMPORTS OF MERCHANDISE, BY PRINCIPAL CUSTOMS DISTRICTS

NOTE.—All figures in thousands of dollars. Fiscal years to and including 1915, thereafter, calendar years. Figures represent specie values except for exports for years 1865 and 1870-1878. Areas of districts were rearranged July 1, 1913. Prior to that date some of the districts were more restricted. However, in most cases, this change only slightly affects the comparability of the figures. Prior to 1914 the statistics given in the table for Buffalo include the (former) districts of Buffalo Creek and Niagara; those for Michigan include the (former) districts of Superior, Huron, and Detroit; and those for Massachusetts and Maryland were the former districts of Boston and Baltimore, respectively. See also headnote, Table 475

No. 480.—EXPORTS OF UNITED STATES MERCHANDISE BY COMMODITY GROUPS AND ARTICLES

NOTE.—Data are for calendar years. Figures for 1921-1925 and 1929-1930 are annual averages. For a number of items data are not shown separately for all years from 1921-1930 and for this reason many averages for two, three, and four years are shown in the table. Averages shown for group totals, however, always cover five years. In some cases, the data does not add to the total because of the different periods covered by the averages. For annual averages for 1910-1914, see Statistical Abstract 1930, Table 547.

No. 481.—GENERAL IMPORTS OF MERCHANDISE BY COMMODITY GROUPS AND ARTICLES

NOTE.—Data are for calendar years. Figures for 1921-1925 and 1926-1930 are annual averages. For a number of items data are not shown separately for all years from 1921-1930, and for this reason many averages for two, three, and four years are shown in the table. However, averages shown for group totals always cover five years. In some cases the detail does not add to the total because of the different periods covered by the data. For 1929 through 1932 a small item, "Articles, ordinarily dutiable, imported free" is not shown separately except in group C, but is included in the total for each group. For annual averages for 1910-1914, see Statistical Abstract 1930, Table 548

23.—COMMERCE OF NONCONTIGUOUS TERRITORIES

GENERAL NOTE.—In the general foreign-trade statistics of the United States presented in the preceding section, the Philippines and Virgin Islands are treated as foreign countries and their trade with the United States is included while their trade with other countries is not included. On the other hand, Puerto Rico, Hawaii, and Alaska are treated as integral parts of the United States, so that trade between them and continental United States is not included, while trade between them and foreign countries is included; each of these three territories appears as a separate customs district. Neither trade of American Samoa and Guam with foreign countries nor shipments between them and United States are included in the general tables on foreign trade. See also Table 456, p. 400.

The tables in this section present the total foreign trade of each of the United States territories and possessions and show separately the trade with Continental United States (unless otherwise indicated) and with foreign countries, including other United States territories and possessions.

¹ The discrepancy between the United States figures of exports to the Philippines prior to 1911 and the Philippine figures of imports from the United States in corresponding periods is due chiefly to the fact that the Philippine import figures prior to that year omit merchandise imported free of duty for the use of the Government or for use in construction and equipment of railways in the islands, under the act of Feb. 6, 1905, while the United States returns omit only Government supplies carried by Government vessels.

No. 505.—DRAINAGE: SUMMARY FOR THE UNITED STATES

NOTE.—The statistics for drainage on farms in the first part of this table were collected from the individual farmers while those for drainage enterprises were obtained from a special canvass of organized drainage enterprises. A farm may have artificial drainage without being connected with any general enterprise, conversely, a general enterprise may facilitate the ultimate removal of water from a farm which has itself no artificial drainage. Drainage enterprises comprise public corporations and local improvement districts established under State laws relating to drainage, commercial enterprises draining land for sale, other organizations engaged in extensive land drainage work, and tracts of 500 acres or more drained by individual farm owners. The enterprises may include timbered and other unimproved land not yet in farms. The canvass of drainage enterprises did not include any of the northeastern States, and no enterprises were found in Alabama or West Virginia, and in 1919 none also in Virginia.

¹ Revised estimates as of Jan. 1, 1925.

² For definition of urban and rural population, see headnote, Table 7, p. 6.

³ The 1930 farm population comprises all persons living on farms without regard to occupation; the 1920 figures include also those farm laborers (and their families) who, while not living on farms, lived outside the limits of any incorporated place. A further difference is due to the fact that the 1920 census was taken in January, while the 1930 census was taken in April, when the number of persons on farms is appreciably larger. For farm population by States see Table 10, p. 8.

⁴ Farm population figures were obtained on the farm schedule in the Agricultural Census of 1925, while in 1920 and 1930 they were obtained from the population schedule. Owing to the different method of collecting the information, the 1925 figures are not here presented for comparison with the 1920 and 1930 returns pending a further analysis of the data.

⁵ These figures include the value of fences, tile drains, and other incidental improvements on the land, excluding only the value of buildings.

⁶ Domestic animals, chickens, and bees.

¹ The classification by size in this section of the table, as in the preceding section, is based on the entire area of the farm.

² All data shown for 1910 and 1920 represent improved land. Data for improved land was not called for on the schedules of 1925 and 1930.

³ Standing renters included with “Cash tenants” in 1910; with “Cash tenants” for the Northern and Western States, and with “Other tenants” for the Southern States in 1920, and with “Other tenants” for all States in 1925 and 1930

No. 534.—FARMERS' BUSINESS ASSOCIATIONS: NUMBER OF ASSOCIATIONS LISTED AND ESTIMATED MEMBERSHIP AND BUSINESS, BY STATES AND COMMODITY GROUPS

NOTE—Business in thousands of dollars. Estimates are based on reports received from association officers. Membership includes shareholders, contract members, shippers, consignors, and patrons. Business includes the f o b. value at shipping point of farm products sold by the associations, the sales value of farm supplies sold to members, and the revenue derived by associations rendering services such as ginning cotton, warehousing tobacco, storing wheat, etc.

No. 535.—INDEXES OF THE VOLUME OF NET AGRICULTURAL PRODUCTION

NOTE.—1919-1927=100. Indexes are based on estimates of production for sale and for consumption in the farm home. Production fed to livestock or used for seed is not included. Calendar-year production of livestock and livestock products are here compared with crop production of the same year. Commodities included in the index contribute about 90 per cent of the gross income from agricultural production.

No. 536.—ESTIMATED GROSS INCOME FROM FARM PRODUCTION

NOTE.—In millions of dollars. For explanation of gross income see headnote, Table 538. Data for 1924 to 1932 are based on State totals (shown for 1929 to 1932 in Table 539) adjusted to exclude interstate sales of seeds for planting and to include estimates of income from poultry other than chickens not estimated by States. Figures for 1929 to 1932 are based on production data revised according to the Census of 1929. Estimates for 1924 to 1928 are still subject to revision.

No. 538.—ESTIMATED FARM VALUE OF PRODUCTS, GROSS INCOME, AND CASH INCOME: By Commodities

NOTE.—Farm values of crops and animal products are obtained by multiplying State quantities by State average prices. Prices used in most cases are weighted averages—for animal products, calendar-year averages, for crops, averages for the period during which the crop is marketed. Gross income represents value of farm production sold plus value of production retained for use in the farm home, excluding, in the case of crops, amounts retained for feed and seed and amounts unfit for sale and consumption. Cash income excludes products used in the farm home.

[Data in this section relate to continental United States]

No. 547.—DOMESTIC ANIMALS: NUMBER AND VALUE OF ANIMALS ON FARMS

NOTE.—Animals of all ages are included except in figures for cattle and sheep, 1880 and 1890, which are nominally exclusive of calves and lambs, respectively. Value includes only animals specified. The difference in date of enumeration affects the comparability of the census figures for all classes and especially for swine.

No. 559.—FARM PRICES OF ANIMALS AND ANIMAL PRODUCTS

NOTE.—All prices are in cents per pound except for eggs which are in cents per dozen. Prices represent weighted averages for the entire country. Annual averages are weighted according to volume marketed each month. Market year begins in October for hogs, June for lambs, July for chickens, April for eggs. Quotations are as of the 15th of each month.

No. 560.—MEATS AND LARD: PRODUCTION, EXPORTS, IMPORTS, AND CONSUMPTION, AND NUMBER OF ANIMALS SLAUGHTERED UNDER FEDERAL INSPECTION

NOTE.—All figures, except per capita, in millions of pounds. Uninspected slaughter is estimated by use of average carcass weights and dressing percentages obtained from packers and stockyard data, census reports, etc. The edible offal (liver, pluck, etc.) is disregarded. Exports include shipments to non-contiguous territories. Figures of consumption beginning with 1916 include differences between quantities in storage at beginning and end of year. Estimates of uninspected slaughter for 1932 are not yet available.

No. 572.—WOOL: PRODUCTION, IMPORTS, AND EXPORTS OF THE UNITED STATES

NOTE.—All figures in thousands of pounds. Production, except Census data, is estimated and is for calendar years. Pulled wool is included beginning 1900 and was probably included for 1870 to 1899, though the exact basis of the estimates for these years is not known. Figures for 1839, 1849, and 1859 include only fleece. Exports and imports for 1839 are for the fiscal year ended Sept. 30; for 1849 and 1859, fiscal years ended June 30, subsequently, calendar years. Imports and foreign exports prior to 1914 and domestic exports include hair of the camel, Angora goat, alpaca, and other like animals.

No. 579.—AVERAGE VALUE PER ACRE OF 10 LEADING CROPS COMBINED

NOTE.—Corn, wheat, oats, barley, rye, buckwheat, potatoes, hay, tobacco, and cotton. These comprise nearly 90 per cent of the area in all field crops, and their average value closely approximates the value per acre of the aggregate of all crops. The value is based on average farm price of Dec. 1. Data for 1932 have not been computed

1 Excluding 14,502,922 acres reported for corn cut for fodder, a large part of which is duplicated in the acreage shown for corn harvested as grain.

2 Including land in fruit orchards, vineyards, and planted nut trees (6,086,178 acres) which was not reported in 1919, excluding acreage of annual legumes saved for hay (3,067,710 acres) which is practically all duplicated in the acreage shown for various individual annual legumes grown alone.

3 Published as "Kaffir and millo" prior to 1929, figures include sorghum seed.

4 Excluding velvet beans, the acreage is largely duplicated in the acreage shown for hay and forage.

5 Including velvet beans only. 6 7/8 of 2,000 pounds.

7 Including the acreage and value of sugarcane for sugar or for sale to mills, does not include the acreage of sugarcane for seed and other purposes not specified.

8 Running bales. 9 Including tangierines in 1919 and tangierines, mandarins, etc. in 1929. 10 Less than \$500.

No. 583.—ACREAGE, PRODUCTION, AND VALUE OF PRINCIPAL CROPS: ESTIMATES OF THE DEPARTMENT OF AGRICULTURE

Note.—Tons are of 2,000 pounds. For weights of the units of measurement for principal products, see Appendix, p. 767. The approximate weights of units of measurements for other products are as follows: Number of pounds to a bushel—sweetpotatoes, 54; grain sorghums, 56; clover seed, 60. Number of pounds to a barrel of cranberries, 100. Prices and yields for the periods are weighted averages except for cotton and cottonseed, which are simple averages of prices and yields for the individual years.

² Weighted average price for the crop marketing season

³ Cotton acreage and yield per acre have been revised for all years and production for 1913 to 1924 adjusted to exclude small amounts produced in lower California ginned in United States. Production is in running bales 1866 to 1899, inclusive, 500-pound bales, gross weight, thereafter Cottonseed production from reports of the Census Bureau. Cottonseed prices are as of Nov. 15, 1911 to 1920, Dec 1 thereafter except as noted. Values are based on these prices.

¹ Based on weighted average price for the crop marketing season² Weighted average price for the crop marketing season³ 3-year average, no data for 1897 and 1898.⁴ Not included in tame hay¹⁰ Crops produced in California and Florida from bloom of the years specified in stub. In California, crop year begins Nov 1, contents of box averages about 70 pounds, and value is calculated on packed-box basis at approximate net price paid to growers for naked fruit delivered to packing house. In Florida, crop year begins Sept. 1, box contains about 83 pounds of fruit, and value of crop is calculated on the approximate price paid to growers per packed box, not including selling charges.¹¹ Based on average price for the crop marketing season¹² Average price for the crop marketing season

No. 585.—COTTON AND COTTONSEED: AREA, PRODUCTION, AND FARM VALUE, By STATES

NOTE.—Cotton production excludes linters. Figures for production of cotton and cottonseed in some States differ slightly from Census figures on ginnings due to ginnings in one State of cotton grown in another. Where figures are not shown for the individual States, separate data are not available for the entire period but are included in the United States totals. Yields and prices for the periods are simple averages of the figures for the individual years. Tons are of 2,000 pounds. Acreage and yield per acre for all years have been revised by the Department of Agriculture and minor adjustments made in cotton production for Alabama, California, Florida, North Carolina, Texas, Virginia, and the United States total. For the States named cottonseed production and value of cotton and cottonseed have been revised by the Bureau of Foreign and Domestic Commerce pending revision of these items by the Department of Agriculture.

¹ Includes Hawaii, Puerto Rico, and the Philippine Islands; Virgin Islands included after 1916

² Imports from the Philippine Islands excluded beginning 1900; reexports deducted

³ Includes shipments to Hawaii and Puerto Rico. Excludes direct exports from them to foreign countries and also reexports of imported raw sugar

⁴ Sugar used in the manufacture of other commodities for export on which drawback was paid.

⁵ Stocks at the beginning or end of year ignored.

⁶ Except beet sugar production and exports prior to 1909 which are chiefly refined.

No. 603.—SUGAR BEETS AND BEET SUGAR: PRODUCTION

NOTE.—Prior to 1924 acreage and production of beets include a small quantity produced in Canada for United States factories. The year shown is that in which beets were grown, sugar-making campaign extends into succeeding year. "Per cent of sucrose in beets" is based on analysis, "Per cent extracted" is per cent of total weight of beets actually recovered by factories. United States totals include data for States not shown. Tons are of 2,000 pounds.

No. 609.—COTTON: PRODUCTION, CONSUMPTION, EXPORTS, IMPORTS, AND PRICES

NOTE.—Production, consumption, and exports beginning 1914 are in thousands of running bales (counting round as half bales), these items prior to 1914, and net imports, all years, are in thousands of 500-pound bales, gross weight. Production statistics relate to the growth year indicated in the stub. Other statistics for the most part relate to the 12-month period roughly corresponding to the marketing of the crop, there have been minor variations from time to time in the periods covered, but consumption, exports, and imports, beginning 1914, and prices, beginning 1910, are for the 12 months ended July 31 following the year indicated in the stub. Prices for 1902 to 1909 represent the price of the average grade marketed in New Orleans up to April 1 of the following year, from 1910 to date the average price on the farm of all lint cotton throughout the country.

No. 622.—GRAIN RECEIVED AT SIX ATLANTIC PORTS

NOTE.—Data are for calendar years. Total receipts by ports include flour, meal, and malt reduced to grain equivalent. Receipts at New York, Boston, Philadelphia, and Baltimore include shipments from the West to foreign countries through these ports on through bills of lading. Receipts at Baltimore include flour ground by city millers, and therefore duplicate an equivalent quantity of wheat received in grain

No. 626.—FREIGHT RATES ON GRAIN, FLOUR, AND PROVISIONS, CHICAGO TO EUROPEAN PORTS

NOTE.—Rates cover all-rail transportation to New York and steamer to foreign ports. Rail rates on grain and flour are reshipping rates. Steamer rates are berth rates. Owing to the war complete statements of freight averages for 1914 to 1916 are impossible and for 1917, 1918, 1919, and, in the case of a number of ports, for the earlier months of 1920 no figures are available

[Data in this section relate to continental United States only except those for national forests which include Alaska, or Alaska and Puerto Rico, as indicated]

No. 628.—FORESTS: ESTIMATED ORIGINAL AREA, AREA IN 1930, STAND OF SAW TIMBER, AND ANNUAL GROWTH, 1930, BY REGIONS

NOTE.—Data in the following table are necessarily approximate. The original area and area in 1930 refer only to land capable of producing commercial timber in commercial quantities, and do not include the low-grade woodland and scrub; the 11,000,000 acres in parks, monuments, etc., are excluded from the forest area in 1930. Annual growth relates to acreage specified as growing area, other areas having no growth in excess of decay.

¹ Figures are based upon partial information only, from incomplete reports. Reliable data are not available prior to organized protection.

² Figures do not take into account the vast amount of intangible and indirect damage resulting from forest fires, such as that through decay or damaged timbers, replacements of desirable species of trees by less desirable but more fire-resistant ones, soil deterioration and erosion, loss of wild life, uncertain stream flow, interrupted tourist traffic, and the like

³ The increase in total acreage is primarily nonforest land.

No. 637.—LUMBER: REPORTED PRODUCTION, BY SPECIES, AND AVERAGE VALUE

NOTE.—For 1889, 1914, 1921, 1923, 1925, and 1927 custom mills are excluded and beginning with 1911 for each year except 1919 mills cutting less than 50,000 board feet are excluded. Custom mills are much less important in recent years than formerly. Apart from the specific exclusions mentioned there are other variations in the completeness of the returns

¹ The figures of turpentine and rosin from crude gum beginning with 1919 and from wood beginning with 1925 refer to the crop year ended Mar. 31 of the year following. All other figures relate to calendar years.

² Compiled from data reported by establishments engaged in the turpentine and rosin industry.

³ Compiled from data reported by establishments engaged in the wood-distillation industry.

⁴ Not reported.

⁵ Includes for 1909 and 1914, 18 310 gallons and 92,401 gallons, respectively, of turpentine and for 1914, 4,495 barrels of rosin reported by establishments engaged in the manufacture of lumber and timber products.

⁶ Compiled by the Turpentine and Rosin Producers' Association.

⁷ Compiled by the Bureau of Chemistry and Soils, Department of Agriculture.

⁸ Estimated; Savannah Naval Stores Review, and Bureau of Chemistry, Department of Agriculture.

⁹ Compiled by J. E. Lockwood, Hercules Powder Co., for 1926, by the Producers' Committee, J. E. Lockwood, secretary, for 1928.

No. 660.—PRODUCING MINES AND QUARRIES: SUMMARY, BY STATES

NOTE.—Figures for 1919 and 1929 have been revised to make them comparable except for 1919 where data for revision were not available, and for certain States for 1929 where revision would result in disclosure of individual operations. Therefore, the totals for the United States are less than the sum of the figures for the States for both years and for geographic divisions for 1919, also the totals for most of the geographic divisions for 1929 are less than the sum of the figures for the States

No. 661.—PRODUCING MINES AND QUARRIES: SUMMARY BY INDUSTRIES, CONTINENTAL UNITED STATES

NOTE.—Figures for 1919 and 1929 for the limestone, sandstone, abrasive materials, and silica industries are not strictly comparable, owing to the inclusion or exclusion of data for 1929 not similarly treated for 1919. For the limestone industry, data for quarrying operations of lime and cement manufacturers are included in the figures for 1929 but not in those for 1919. For the sandstone industry, data for enterprises whose product was ground into glass or molding sand, or used as refractory materials (siliceous mica schist and ganister), etc., are included in the figures for 1919 but excluded from those for 1929 and included in the figures for the glass-sand, molding-sand, abrasive-materials, or silica industries, according to the nature and purpose of the final product. Data for diatomaceous earth are included in the figures for abrasive materials in 1919 and in those for silica in 1929.

¹ For 1919 includes, besides those specified, statistics for 15 enterprises in the chromite industry; the value of products of this industry was less than one-tenth of 1 per cent of the total for all industries. For 1929 does not include data for the glass-sand, molding-sand, and sand and gravel industries, no data having been collected for these industries in 1919.

² Distributed among other stones

³ Emery; garnet and industrial sapphires and diamonds; grinding pebbles and tube-mill lining; grindstones, oilstones, whetstones, scythesones, and rubbing stones, pumice and volcanic ash (pumicite).

No. 664.—MINERAL PRODUCTS OF THE UNITED STATES: QUANTITIES AND VALUES

NOTE.—Data cover continental United States and, for leading products, outlying areas. Certain of the figures represent shipments rather than quantity mined, and some of the figures for 1932 are estimates. Blank spaces indicate absence of data in most cases, method of computing total value is indicated by footnotes. Short tons are 2,000 pounds; long tons, 2,240 pounds.

¹ From both domestic and foreign ores. No comparable data for 1931 and 1932, estimate of value of primary antimony and lead contents of antimonial lead from domestic sources included in total value of metallic products.

² Content of antimonial lead. Value excluded from metallic total as the value of the antimony is included in the antimonial lead value.

³ All from foreign ore. Value not included in total value. Bureau of Mines not at liberty to publish figures for 1931 and value for 1932.

⁴ Value included in total value of metallic or nonmetallic products. Bureau of Mines not at liberty to publish figures.

⁵ Value not included in total value, since value of product derived therefrom, or of raw material used, is accounted for under other items.

⁶ Figures obtained through cooperation with Bureau of the Census.

⁷ Figures not available. Value of products derived therefrom, or of raw materials used, is included elsewhere.

⁸ Figures obtained through cooperation with Bureau of the Census.

⁹ Figures not yet available. Estimate of value included in total value of nonmetallic products.

¹⁰ Includes brown coal and lignite and anthracite mined elsewhere than in Pennsylvania.

¹¹ Turpentine. Value of diatomite is included in total value of nonmetallic products.

¹² No canvass. Estimate of value included in total value of nonmetallic products.

¹³ Canvass discontinued after 1915. Value of iron ore sold for paint included under "Unspecified."

¹⁴ Sublimed blue lead, sublimed white lead, leaded zinc oxide, and zinc oxide.

¹⁵ Figures include pyrites concentrates from Tennessee and partly desulphurized tailings from zinc operations in Wisconsin; similar output in 1915 to 1925 was not included.

¹⁶ In 1915 includes 59,189 tons and in 1920, 23,728 tons of stronger acid, not converted to 60° Baumé.

¹⁷ Tale only. Value of soapstone is included in value of nonmetallic products. Bureau of Mines not at liberty to publish figures.

¹⁸ Source: Bureau of Mines, Department of Commerce.

¹⁹ Product from domestic ores only.

²⁰ Quantity, 1,000 pounds, value, \$220.

²¹ Estimate of value included in total value of nonmetallic products.

No. 665.—MINERAL PRODUCTION, BY STATES

NOTE.—Iron ore, not pig iron, is taken as the basis of valuation of iron and in the case of other metals, mine production (recoverable content of metals) is the basis

No. 671.—PRODUCTS OF STEEL WORKS AND ROLLING MILLS, AND OF THE WIRE, TIN-PLATE, AND CAST-IRON PIPE INDUSTRIES

NOTE.—The overlapping of the industries shown in this table results in considerable duplication in tonnages shown. The products chiefly used further in manufacture are wire rods, plates, and sheets, black plates for tanning, and skelp. The figures under "Wire," "Tin and terneplate," and "Cast-iron pipe and fittings" include data for products of these departments of steel works and rolling mills and of all other industries producing these commodities. For more detailed statistics, see Census reports for these industries

¹ Of 2,240 pounds.

² In addition steel castings were produced for sale by establishments classified in other industries as follows: For 1927, 59,809 tons valued at \$10,464,311; 1929, 33,550 tons valued at \$6,635,760; 1931, 13,916 tons valued at \$2,578,080. Steel castings were also reported by the "Foundry and machine-shop products, not elsewhere classified" industry as made and consumed in the same works as follows: For 1927, 16,968 tons, 1929, 33,980 tons, 1931, 13,210 tons. Steel castings are produced and consumed in further manufacture to some extent in other industries, but no data for such production are collected.

³ Does not include tonnage of rolled billets and blanks for seamless tubes, nor tonnage, for sale, of rolled blooms and billets for forging.

⁴ Includes "nail and tack plate" not shown separately to avoid disclosing data for individual operations.

⁵ All iron and steel wire, including that subsequently galvanized, otherwise coated, and cold rolled.

⁶ Of 2,000 pounds.

⁷ Figures for 1927 include all cold-rolled wire; for 1929 and 1931, only wire cold rolled from drawn wire.

⁸ No comparable data.

⁹ For 1927 bronze wire was included with "Other metal wire."

¹⁰ Not including value of nails and tacks made from nail and tack plate.

¹¹ Of 100 pounds.

¹² Automobile skid chains included in "Other fabricated iron and steel wire products".

¹ Includes much duplication.² Value of products less cost of materials.³ Returns were not secured for number of salaried employees and it is probable that "wages" included amounts paid for salaries, and "wage earners" may have included some salaried employees.⁴ No data.⁵ Blast furnace data are included with steel works and rolling mills.⁶ Includes data for 4 establishments engaged in production of sintered ore and fine dust and operated independently of blast furnaces**No. 674.—AGGREGATE DOMESTIC EXPORTS OF HEAVY IRON AND STEEL**

NOTE.—Prior to 1922, the small items for which quantity is not available are excluded, while in later years all items are included. Ferromanganese is included for all years. The small item "steam and hot water heating boilers and radiators," formerly classified as heavy iron and steel, is excluded beginning 1922

No. 679.—COPPER: PRODUCTION, EXPORTS, IMPORTS, AND CONSUMPTION

NOTE.—All quantities except ore produced in millions and tenths of millions of pounds. Production figures include continental United States and Alaska. Owing to the varying stages of production, the stocks in different classes of hands, the redistribution of copper previously purchased, the recovery and use of old copper, etc., calculations of consumption are somewhat uncertain. The American Bureau of Metal Statistics presents consumption estimates rather widely different from those given below. Consumption as shown represents the quantity of copper withdrawn on domestic account, but not actual domestic consumption, as no account is taken of consumers' stocks

No. 682.—EXPORTS AND IMPORTS OF COPPER

NOTE.—Exports are those classed as "domestic" in the foreign trade statistics but include copper smelted or refined in the United States from imported ore or unrefined metal. Values include all forms of copper. Quantities represent all copper except the small item, "other manufactures." Copper content of exports of ore for years 1891-1915 and of imports for years 1894-1903 was estimated

No. 683.—REFINED PRIMARY LEAD AND SECONDARY LEAD

NOTE.—Production in short tons (2,000 pounds), values, except price per pound, in thousands of dollars. This table, except the column for secondary lead, relates to new (primary) lead only, the totals include lead derived from both domestic (including Alaska) and foreign ore. General production figures and production of desilverized lead do not include antimonial lead, shown in next to the last column. This table represents exclusively refined lead, while in Table 684 part of the lead from domestic ore is unrefined

No. 691.—SILVER: PRICE, AND VALUE OF SILVER IN THE DOLLAR

NOTE.—The London price is converted to the basis of the ounce 1,000 fine and converted to American money throughout at par of exchange, notwithstanding the fact that from 1918 to 1924, and in 1931 and 1932 the pound sterling was depreciated as compared to the dollar. During these periods of depreciation the commercial ratio is computed on the basis of the New York average price; the value of fine silver (371¼ grains) in the dollar is computed on the basis of the New York average price beginning 1918. For other years computations are on the basis of the London quotations, which were at all times close to the New York quotations.

No. 694.—COAL PRODUCTION: QUANTITY AND VALUE

NOTE.—Quantities in thousands of short tons (2,000 pounds); values in thousands of dollars. Includes coal consumed at mines. Figures for anthracite relate to Pennsylvania output only, those for bituminous relate to continental United States and Alaska. Bituminous coal includes brown coal and small amounts of anthracite outside of Pennsylvania. Comparatively little coal is held in stock at the mines.

No. 701.—NATURAL GAS AND NATURAL GASOLINE

NOTE.—Quantities of gas in millions of cubic feet, of gasoline in thousands of gallons; values in thousands of dollars. Production figures for gas refer only to that marketed, in addition to which considerable quantities are used by producers, and large quantities are wasted or lost. Values given are at the point of consumption. Consumption figures by States differ greatly from production figures by reason of interstate transportation.

No. 705.—RETAIL PRICES OF GAS IN PRINCIPAL CITIES

NOTE.—Prices are net per 1,000 cubic feet of gas for household use. Prices for manufactured gas are based on a family consumption of 3,000 cubic feet per month. In cities where a service charge or a sliding scale is in operation rates are slightly higher for families using less than 3,000 cubic feet per month and slightly lower for those consuming more. Prices for natural gas and for mixed manufactured and natural gas (principally natural gas) are based on a family consumption of 5,000 cubic feet per month.

No. 719.—CEMENT PRODUCTION: QUANTITY, BY KINDS, AND TOTAL VALUE

NOTE.—Portland cement is expressed in barrels of 376 pounds; masonry, natural, and puzzolan cement in 1921 and later years in 376-pound barrels but prior to 1921 in barrels of 240, 265, and 320 pounds, respectively. For 1912 through 1924 the figures for masonry, natural, and puzzolan cement represent shipments

32.—MANUFACTURES

[Data in this section relate to continental United States. For additional statistics regarding food manufacturing industries and mineral manufacturing industries see sections on Farm Animals and Animal Products, Farm Crops and Foodstuffs, and Mining and Mineral Products]

GENERAL NOTE.—Prior to 1899 census statistics of manufactures were collected decennially and from then to 1919 every five years. Beginning with 1921 data are being collected every two years. For the census of 1899 and previous censuses data were collected for both factories and hand and neighborhood industries. For the census years 1904 to 1919, inclusive, factories having products valued at \$500 or more were included, but the statistics beginning 1921 (except as to certain major items shown for that year in Table 727 only), relate only to establishments having products valued at \$5,000 or more. However, in 1921, establishments having products valued at \$500 or more but less than \$5,000, while constituting 21.6 per cent of the total number of establishments, employed only six-tenths of 1 per cent of the total number of wage earners, and had an output of only three-tenths of 1 per cent of the total value of products.

The statistics for automobile repairing, collected for 1914 and 1919, have been excluded from Tables 726 to 730. Data for "Coffee and spices, roasting and grinding," have been included, except for 1925, for which year such data were not tabulated for the United States as a whole, and data for "Poultry killing, dressing, and packing, wholesale" are included for all years except 1927, for which year this industry was not canvassed. In Table 726, data for central-administrative-office employees have been excluded for 1923 and later years. The figures for 1914, 1919, and 1921, however, include such data.

Figures for wages, cost of materials, etc., and value of products are greatly affected by changes in the buying power of money or, in other words, by the general levels of prices and wages. Figures of total cost of materials, etc., and total value of products for many individual industries, for all groups of industries, and especially for all industries combined, involve much duplication. This is due to the use of products of a given establishment as material for another in the same or a different industry.

¹ No comparable data.

² Not called for on schedule.

³ Figures include purchased power other than electric.

⁴ Data approximately the same as given for factories and hand and neighborhood industries, as the amount of horsepower used in the latter is small.

⁵ Includes data for all establishments reporting products valued at \$500 or more. This item was not tabulated separately for establishments reporting products valued between \$500 and \$5,000.

¹ To make the percentages for the number of establishments comparable, those for all 6 years have been based on the number of establishments reporting products valued at \$5,000 or more. The percentages for wage earners and value of products, however, have not been similarly adjusted, the comparability of these percentages having been affected very slightly by the omission of small establishments in 1923, 1925, and 1929.

² No data for establishments with products under \$5,000 in value have been tabulated for 1923, 1925, and 1929.

³ The data for the 53,999 establishments in the "Less than \$5,000" class are not included in other tables showing statistics for 1921.

⁴ Figures include data for the \$500,000 to \$1,000,000 class.

⁵ Data included with the \$100,000 to \$500,000 class

¹ Not called for on schedule² The comparability of the figures for 1919 with those for later years is affected by the decrease in the legal manufacture of alcoholic beverages resulting from the enactment of the national prohibition act.

2 The decrease in the 1927 figures was chiefly due to practical ceasing of operations of a large company for a few months of the year

No. 730.—MANUFACTURES: SUMMARY FOR INDIVIDUAL INDUSTRIES

NOTE.—The figures given in this table do not represent exactly the numbers of wage earners, values of products, etc., assignable to the classes of commodities from which the industries derive their names, as it is necessary for census purposes to classify each establishment as a whole in some one industry, according to its product of chief value, although in many cases a single establishment manufactures two or more classes of commodities. The figures for cost of materials and value of products for each group and each subgroup include considerable duplication due to the use of the products of one industry as the materials for another, and in some cases similar duplication occurs within an industry. No data for horsepower were collected for 1931. For totals for all industries and for 16 great groups see Table 729. Five census years have been shown for all industries that reported \$200,000,000 or more in value of products or over 50,000 wage earners in 1929, and three census years for other industries, except as indicated by footnotes.

¹ Because of a change in classification, no comparable figures can be shown for earlier years.² Owing to a change in classification data for 1931 are not strictly comparable with data for prior years.³ The separation of the industry "Paper and pulp" into the "Paper" and "Pulp (wood and other fiber)" industries for 1927 resulted in counting as 2 establishments each mill which manufactured both paper and pulp and in a duplication in the statistics as combined. The figures for 1927 to 1931, are, therefore, not strictly comparable with those for earlier years. Figures in italics have been adjusted for comparison with 1925 and 1923, counting as a single unit mills manufacturing both pulp and paper.⁴ Figures shown for paper represent the combined total for paper and pulp.

¹⁴ Figures for 1929 and prior years include "Iron and steel, processed," abandoned as a separate classification for 1931 and for that year included with "Foundry and machine-shop products, not elsewhere classified," in the machinery group.

¹⁵ Similar products are manufactured to a considerable extent by departments of "Steelworks and rolling-mill products" industry. The figures here given refer only to establishments engaged primarily in the manufacture of the specified classes of products.

¹ Because of a change in classification, no comparable figures can be shown for earlier years

¹⁸ Establishments classified in the "Jewelers' findings and materials" industry for 1931 were, for the most part, classified in the "Jewelry" industry in prior years; figures for the latter industry for 1931 are, therefore, not strictly comparable with those for prior years. Figures shown in italics have been adjusted for comparison with those for 1931.

¹⁹ Prior to 1931 this industry covered radio apparatus and tubes included for 1931 in a new classification, "Radio apparatus and phonographs." Figures for 1931 are, therefore, not comparable with those for prior years, figures shown in italics have been adjusted for comparison with those for prior years.

²⁰ For 1929 and 1931 certain establishments, formerly classified in this industry were included in a new industry classification "Machine-tool accessories and machinists' precision tools and instruments." Figures for 1929 and 1931 are, therefore, not strictly comparable with those for prior years. Figures in italics have been adjusted for comparison with those for later years.

²¹ Includes for 1931 "Iron and steel, processed," formerly treated as a separate industry in the "Iron and steel" group. Figures for prior years have not been revised to include such data.

²² No comparable data for prior years. Radio apparatus was formerly included in "Electrical machinery, apparatus, and supplies" and "Phonographs," was a separate industry in the "Miscellaneous industries" group.

²³ Includes for 1931 data for certain of the establishments making carriage, wagon, sleigh, and sled materials, formerly classified in a separate industry. The figures for prior years have not been revised to include such data.

²⁴ Formerly classified as "Car and general construction and repairs, steam-railroad repair shops."²⁵ Formerly classified as "Car and general construction and repairs, electric-railroad repair shops."²⁶ The figures for 1929 and 1927 have been revised by subtracting the figures for "Phonographs," which has been abandoned as a separate industry, and included with "Radio apparatus and phonographs" for 1931.²⁷ Figures for 1929 and prior years have been revised to exclude "Whips," abandoned as a separate industry for 1931, and included in "Saddlery, harness, and whips," in the "Leather and its manufactures," group. Data for "Phonographs," a separate industry in the subgroup, "Musical instruments," in the "Miscellaneous industries" group prior to 1931, have been added for 1929 and prior years. Figures for "Dairymen's supplies, creamery, cheese-factory, and butter-factory equipment, and poultrymen's and apiarists' supplies," and "Sandpaper, emery paper, and other abrasive paper and cloth," which were abandoned as separate industries and included in industries in other groups for 1931, are included in this group for 1929 and prior years. For 1931 the motion-picture industry was not treated as a manufacturing industry, but for years prior to 1931 was included with this subgroup.

No. 731.—SUMMARY FOR ALL MANUFACTURING INDUSTRIES COMBINED:
By GEOGRAPHIC DIVISIONS AND STATES

NOTE.—Data for "Coffee and spices, roasting and grinding" are included for all years except 1925, for which year this industry was not tabulated for the United States as a whole, and data for "Poultry killing and dressing" are included for all years except 1927, for which year this industry was not canvassed. No data for establishments with products valued at less than \$5,000 are included. Statistics for horsepower were not collected for 1931.

No. 733.—INDEXES OF PRODUCTION OF MANUFACTURES AND MINERALS

NOTE.—The manufactures index covers 49 industries and the minerals index 8, prior to 1932. Indexes for 1932 exclude copper, data for which are not available for that year, and are, therefore, not strictly comparable with figures for earlier years. Both indexes have been adjusted for seasonal variations and for the number of working days in the month.

No. 734.—MANUFACTURING PRODUCTION: INDEXES FOR GROUPS OF INDUSTRIES

NOTE.—Monthly average 1923-1925=100. The monthly figures are adjusted for the varying number of working days in each month and for the normal seasonal variations. In computing the indexes, the individual products and industries have been weighted in accordance with their relative importance.

No. 735.—TEXTILE MANUFACTURES: PRODUCTION

NOTE.—In general, most of the articles listed are finished products, but large quantities of partly finished products, especially yarn, made for sale to other establishments of the same or other branches of the textile industry are included. This involves considerable duplication in total value of products and in cost of materials.

¹ Figures for 1927 are not strictly comparable with those for 1929 and 1931, data for the several classes made as secondary products in other industries are included for 1929 and 1931, but not for 1927.

² Excludes cotton jersey which is included with "Other knit products."

³ Included in other knit products.

⁴ Data for other suitings such as mohair, mohair and cotton mixed, woolen-worsted, etc., are included in the figures for "Other woolen and worsted goods."

⁵ Not including binder twine made in penal institutions as follows: For 1927, 57,808,454 pounds; 1929, 47,322,550 pounds; 1931, 52,161,200 pounds.

No. 741.—MISCELLANEOUS INDUSTRIES INVOLVING CHEMICAL PROCESSES: CENSUS STATISTICS OF PRODUCTS

NOTE.—Only major products of a fairly sharply defined character, and in general only those for which quantitative data are available are shown. See also chemicals (Table 739), petroleum refining (Table 711), manufactured gas (Table 702), etc. Semifinished products made for consumption in the same establishment are not included, except where otherwise stated, but there is some duplication in total value of products in certain branches, due to the use of such products as materials by other establishments in the same industry. Tons are of 2,000 pounds.

No. 745.—MACHINERY: VALUE OF THE PRINCIPAL CLASSES MANUFACTURED

NOTE.—Values in thousands of dollars. The various classes of machinery listed are products of a number of industries, such as "foundry and machine-shop products," "agricultural implements," "aircraft," "cash registers, adding and calculating machines," "dairymen's, poultrymen's, and apiarists' supplies," "electrical machinery, apparatus, and supplies," etc. This table is not an industry presentation, but a special presentation giving value of products for groups designated. The values are in part duplicated in other tables in this abstract, such as Tables 743, 744, 746, and 747

No. 751.—COTTON SPINDLES, COTTON CONSUMPTION, AND STOCKS

NOTE.—The statistics for 1915 to 1932 relate to the 12 months ended July 31 and those for prior years to the 12 months ended Aug. 31. South refers to cotton growing States. Consumption is expressed in running bales, counting round as half bales, except that all figures, 1840 to 1870, inclusive, and foreign cotton in all years are in equivalent 500-pound bales. The number of active spindles represents spindles operated for any time, however short, during the year, and is therefore an unsatisfactory measure of activity of the industry.

No. 756.—LEAF TOBACCO: AMOUNTS CONSUMED IN THE MANUFACTURE OF CIGARS, CIGARETTES, CHEWING AND SMOKING TOBACCO, AND SNUFF

NOTE—All figures in thousands of pounds. Figures represent the equivalent in unstemmed leaf tobacco, of stemmed leaf or scraps, cuttings, and chippings. In the following table the tobacco used in the manufacture of cigars and cigarettes was converted on the basis of 3 pounds of stemmed leaf or scraps, etc., to 4 pounds of unstemmed beginning 1915 (conversion prior to 1915 was at the ratio of 3 to 5) and of tobacco and snuff beginning 1903. For 1896 to 1902, tobacco used in manufactured tobacco and snuff was shown only under two heads, namely "leaf" and "scraps." It is probable that stemmed leaf was included with unstemmed tobacco under the head of "leaf" without the one kind being converted to the equivalent in the other. The conversion ratio of 3 to 4 was applied only to "scraps" for these years. Data exclude tobacco used in bonded manufacturing warehouses. See Table 758

**No. 769.—INDEXES OF VALUES OF SALES BY DEPARTMENT STORES:
By FEDERAL RESERVE DISTRICTS AND BY MONTHS**

NOTE.—Compiled from reports of about 360 to 560 firms. Indexes have been adjusted for variations in number of firms reporting and monthly indexes for the varying number of business days in the different months and the effect of changes in the date of Easter. Sales are much affected by changes in price levels

**No. 770.—INDEXES OF VALUE OF SALES OF MAIL-ORDER HOUSES AND
5-AND-10-CENT CHAIN STORES**

NOTE.—Indexes for mail-order houses cover two companies throughout. The number of chain-store companies reporting varied from year to year, but in computing the indexes adjustment has been made for these variations. No adjustment has been made, however, to eliminate the influence of increase in the number of stores operated by the individual companies, which accounts for a considerable part of the increase in the indexes. In the monthly indexes for both mail-order houses and chain stores, allowance has been made for the varying number of business days in the different months, the chain-store indexes have also been adjusted for seasonal variations. Sales are much affected by changes in price levels

No. 771.—HOTELS OPERATING THE ENTIRE YEAR 1929 AND FROM 2 TO 8 MONTHS OF 1929: SUMMARY OF STATISTICS

NOTE.—The hotel census is confined to hotels in the United States having 25 or more guest rooms. It does not include apartment houses, boarding houses, clubs, etc. Hotels that make separate charges for rooms and meals, and hotels that confine their operations to room rentals are classified as European-plan hotels. American-plan hotels are hotels that have a fixed combined rate for rooms and meals. A hotel is classed as "transient" or "permanent" if more than 75 per cent of its patrons are "transient" or "permanent," respectively.

No. 772.—CONSTRUCTION CONTRACTS AWARDED

NOTE.—Data compiled from reports covering contracts awarded in small towns and rural districts as well as large cities. Public works and public utilities cover some projects not susceptible to measurement in terms of floor space, such as highways, pipe lines, subways, etc. Statistics for the 37 States were not compiled for years prior to 1925, but available figures covering a varied number of States for earlier years have been published in the 1932 and previous issues of this publication.

¹ Owing to a change in the classification, data for airports have been excluded from the "Commercial" class and included with "Public utilities" beginning 1930. Separate figures for airports are not available prior to 1930.

² Owing to a change in the classification figures for the "Factories" class exclude data for power plants for all years and for pipe lines beginning 1929 (separate figures not available for years prior to 1929), which data are included with "Public utilities."

³ Figures for the 37 States include all except the 11 States in the Mountain and Pacific divisions.

No. 775.—BUILDING PERMITS ISSUED IN PRINCIPAL CITIES

NOTE.—Figures cover new buildings and repairs to old buildings, but exclude data for installation permits (those for installing boilers, signs, etc.) which are not strictly building operations. These permits are rather numerous, but in value they are of small amount. The number figures represent the number of buildings covered by permits issued (new construction and repairs, etc.), rather than the number of permits. The cities shown had a population of 50,000 or over in 1930. The estimated cost of new buildings only, authorized in 257 identical cities since 1921 is as follows: 1921, \$1,573,000,000; 1922, \$2,489,000,000; 1923, \$3,072,000,000; 1924, \$3,208,000,000; 1925, \$3,805,000,000; 1926, \$3,557,000,000; 1927, \$3,138,000,000; 1928, \$2,995,000,000; 1929, \$2,580,000,000; 1930, \$1,451,000,000; 1931, \$1,049,000,000; 1932, \$379,000,000. Buildings authorized by permit are not always actually constructed, and the actual cost of those constructed may differ considerably from that originally estimated.

¹ Beginning 1926 the indexes, except for Portland cement and structural steel, have been revised to include additional items not previously included; the "All building materials" index also includes plumbing and heating equipment (not shown separately in this table) for which data are not available prior to 1926.

² Excludes tile prior to 1923. ³ Composite price. ⁴ Pittsburgh district. ⁵ Excludes paint prior to 1926.

⁶ Based upon the cost of lumber, steel, cement, and the rates paid common labor.

⁷ Average of March, June, September, and December.

APPROXIMATE WEIGHT OF PETROLEUM AND PRODUCTS

In the United States petroleum and its products are measured by bulk, not weight. Whether handled in containers or without them the quantities are customarily reduced to the equivalent of barrels of 42 United States gallons (barrel thus equals 158.984 liters). In many foreign countries these commodities are measured by weight. The specific gravity of the different grades of crude petroleum and of the finished products varies materially. On the basis of approximate averages the Department of Commerce in converting foreign weight statistics to gallons or barrels of 42 gallons uses the factors shown in the following table:

	Weight of United States gallon		Weight of barrel of 42 gallons
